Report generated 3 October 2026

CONTENTS

What is in this report

01	How this audit was produced Sources, method and the limits of what was measured
02	The ad account Live paid inventory and measurement surface as measured on the crawl date.
03	Findings 5 issues, each with the measurement behind it
04	Opportunity score Five weighted dimensions, scored from measured values only
05	Suggested next steps Ordered by effort against likely impact

01 METHOD

How this audit was produced

- Paid inventory was read from public advertising transparency surfaces on 3 October 2026: the Google Ads Transparency Center (region: India) and the Meta Ad Library (country: India). Ad counts are live counts for the brand term on the day of the crawl.
- The website's platform, response headers, redirect chain and measurement tags were inspected live on 3 October 2026 on the site root of sidsfarm.com. Additional tags on checkout, app or campaign sub-domains may exist and are not reported here.
- Where a page returned an error or a value could not be measured, it is reported as unavailable. Nothing has been inferred to fill a gap.
- Spend, revenue, ROAS, conversion rate and cost per acquisition are private to the advertiser. They were not estimated, and are marked unavailable throughout.
- This is a one-day snapshot. Ads paused, tags changed or campaigns launched after 3 October 2026 are not reflected.

02 LIVE PAID INVENTORY DATA

The ad account

Google creatives live	≈200 creatives in the advertiser account (Sids Farm Private Limited, identity verified by Google) on 3 October 2026; 35 of them point specifically at sidsfarm.com
Ad platforms observed	Google (Ads Transparency Center, region India) · Meta (Ad Library, country India)
Google creative inventory	≈200 creatives in the advertiser account (Sids Farm Private Limited, identity verified by Google) on 3 October 2026; 35 of them point specifically at sidsfarm.com
Meta ads	brand-owned creatives verified by library ID: 1682864186042714 (running since 8 April 2026, WhatsApp-click), 28227187223577653 (since 17 August 2026, app signup), 2322194535253458 (since 18 August 2026)
Measurement tags	GA4 G-YN4FLEL9J2 · Google Tag Manager GTM-57TDVNH · Google Tag Manager GTM-P4DXD97J · Microsoft Clarity · the store's own app config carries meta_pixel_enable: false with an empty meta_pixel_id (verbatim, 3 October 2026)
Site platform	Shopify; Cloudflare in front; HSTS present
Published contact	wecare@sidsfarm.com (published on the cart and collection pages)
Published address	the privacy-policy and terms pages carry a Hyderabad 500085 address — Sid's Farm is headquartered in Hyderabad and serves Bengaluru as a market
Bengaluru relevance	the storefront's location selector lists Bangalore, and the homepage copy reads 'If you're from Hyderabad, Bengaluru, Pune, Vijayawada ... Download our app for hassle-free 7AM deliveries'

Broken paths observed	/pages/faq · /pages/contact · /pages/contact-us · /policies/shipping-policy · /pages/store-locator · /pages/bulk-enquiry · /pages/corporate-gifting → all 404 on 3 October 2026
Spend · ROAS · CPA	unavailable (private to the advertiser)
Crawl date	3 October 2026

COVERAGE

What was measured, and what was not

SURFACE	STATUS	METHOD
Google creative inventory	MEASURED — 200	Google Ads Transparency Center (region India), 3 October 2026
Meta ad inventory	MEASURED — verified ad by ad	Meta Ad Library (country India), 3 October 2026
Measurement tags	MEASURED — GA4 G-YN4FLEL9J2 · Google Tag Manager GTM-57TDVNH · Google ...	HTML inspection of the site root, 3 October 2026
Site platform and headers	MEASURED	Live HTTP response of the site root, 3 October 2026
Checkout and order flow	NOT MEASURED	outside the site root; not crawled
Ad spend, ROAS, CPA	UNAVAILABLE	private to the advertiser; no public source
Published commercial figures	MEASURED	the brand's own published pages and results, as reported

Surfaces marked NOT MEASURED are outside the scope of a public crawl. They are listed so the reader can see exactly where this report's knowledge stops — no value has been estimated to fill them.

03 5 ISSUES, RANKED BY SEVERITY

Findings

HIGH

1. Seven of the storefront's standard trust pages return 404

```
GET https://sidsfarm.com/pages/faq → 404
GET https://sidsfarm.com/pages/contact → 404
GET https://sidsfarm.com/pages/contact-us → 404
GET https://sidsfarm.com/policies/shipping-policy → 404
GET https://sidsfarm.com/pages/store-locator → 404
GET https://sidsfarm.com/pages/bulk-enquiry → 404
GET https://sidsfarm.com/pages/corporate-gifting → 404
(3 October 2026, HTTP status codes as logged)
```

Every path a cautious first-time buyer looks for before paying — how do I reach you, when will it arrive, where are you — is dead. For a subscription product where the first order is a trust decision, this is the most expensive set of pages on the site. Rebuilding them is content work, not engineering work.

HIGH

2. Two Google Tag Manager containers are loading on the same storefront

```
GTM container 1: GTM-57TDVNH
GTM container 2: GTM-P4DXD97J
both present in the same page source, sidsfarm.com, 3 October 2026
also present in the same source: GA4 G-YN4FLEL9J2, Microsoft Clarity
```

Two containers is a classic symptom of a migration that never finished, and the usual result is duplicated purchase or signup events — which then makes every ROAS number you read argue with the bank. Confirm which container is live, merge the tags into it, and remove the other. This is an afternoon of work with an outsized effect on reporting trust.

HIGH

3. The store's own configuration has the Meta pixel switched off while Meta ads are live

```
page source of sidsfarm.com, 3 October 2026 (verbatim):
container_id: "GTM-57TDVNH", measurement_id: "G-YN4FLEL9J2",
meta_pixel_enable: false, meta_pixel_id: "",
built_in_conversion_tracking: 0
and, from Meta's Ad Library, three brand-owned creatives running since April and August 2026
```

Read exactly: this is one integration — the store's own pixel setting — and it is disabled. The pixel could still be fired through GTM-57TDVNH, whose contents cannot be inspected from outside, so this is 'switched off where we can see it', not 'no measurement anywhere'. But when a brand spends on Meta for months while its storefront config says the pixel is off, the first thing to verify is which of the two is true — because that single setting decides whether the Meta spend can be optimised on purchases or only on clicks. Microsoft Clarity is installed alongside, so the session data to check it already exists.

MEDIUM

4. Most of the account's creative volume does not point at the website

```
advertiser account: ≈200 creatives (Sids Farm Private Limited, Verified)
domain sidsfarm.com: 35 creatives
unaccounted: ≈165 creatives point at other destinations
```

The Meta side shows where they go: WhatsApp click-through creatives and app.sidsfarm.com signup ads with tracking macros attached. That is a deliberate subscription-acquisition strategy — but it also means website-based reporting cannot see most of the programme. If subscription growth is the goal, the measurement plan has to follow the creative into the app, not stop at the website.

MEDIUM

5. Meta is already run properly, and it is carrying the response burden

```
library ID 1682864186042714 — running since 8 April 2026, CTA 'Send WhatsApp message'
library ID 28227187223577653 — running since 17 August 2026, 'No diet changes. No extra effort. Just your
everyday milk, now with 22g protein in every pack'
landing:
app.sidsfarm.com/?utm_source=facebook&utm_medium=paid_social&campaign;_id={{campaign.id}}&ad;_id={{ad.id}}...
```

Someone on the team knows what they are doing: the ad copy leads with a product change (22g protein) rather than a discount, and the tracking template passes campaign and ad IDs into the app. The gap is that none of it is joined up to the website's own reporting, so the same customer is counted in two places or in neither.

03 FINDINGS · EVIDENCE REGISTER

Where every number in this report came from

MEASUREMENT	SOURCE	VALUE OBSERVED	DATE
Google creatives	Google Ads Transparency Center (region India)	≈200 creatives in the advertiser account (Sids Farm Private Limited, identity verified by Google) on 3 October 2026; 35 of them point specifically at sidsfarm.com	3 October 2026
Meta ads	Meta Ad Library (country India)	brand-owned creatives verified by library ID: 1682864186042714 (running since 8 April 2026, WhatsApp-click), 28227187223577653 (since 17 August 2026, app signup), 2322194535253458 (since 18 August 2026)	3 October 2026
Measurement tags on the site root	HTML inspection of the site root	GA4 G-YN4FLEL9J2 · Google Tag Manager GTM-57TDVNH · Google Tag Manager GTM-P4DXD97J · Microsoft Clarity · the store's own app config carries meta_pixel_enable: false with an empty meta_pixel_id (verbatim, 3 October 2026)	3 October 2026
Site platform and headers	Live HTTP response of the site root	Shopify; Cloudflare in front; HSTS present	3 October 2026
Published contact	The brand's own contact and policy pages	wecare@sidsfarm.com (published on the cart and collection pages)	3 October 2026

Ad spend / ROAS / CPA	No public source exists	unavailable — not estimated	3 October 2026
Published commercial figures	The brand's own published pages and results	wecare@sidsfarm.com (published on the cart and collection pages)	3 October 2026

Every row above is a readable public surface. Where a row reads unavailable or not measured, that is exactly what was found — the report does not substitute an estimate.

04 SCORED FROM MEASURED VALUES ONLY

Opportunity score

Measurement integrity		2 / 4
GTM, GA4 and Clarity confirmed — but the store's own Meta pixel setting reads disabled, and two GTM containers create duplicate-event risk.		
Conversion observability		3 / 4
App and WhatsApp paths carry tracking macros; website reporting cannot see them.		
Brand consistency		4 / 4
Protein-led product message is consistent across ads and app landing page.		
Technical health		2 / 4
Seven standard paths returning 404 is a live commercial problem.		
Commercial fit		4 / 4
Subscription dairy with real paid spend and a working Meta engine.		

OVERALL

15 / 20

5 of 5 dimensions scored

B — a serious paid engine on a storefront with the basics missing

QUALIFICATION

Read this before acting on it

Public surfaces only; spend, ROAS and churn are not scored because no public source exists for them. The ~200 creative count is the advertiser-level figure on one day, and the 35 is the subset pointing at sidsfarm.com on the same day. Meta counts for this brand term include third-party inventory; only creatives verified on the brand's own page are quoted here.

05 ORDERED BY EFFORT AGAINST IMPACT

Suggested next steps

- 1

LOW EFFORT · IMMEDIATE BENEFIT

Publish the missing trust pages

Contact, FAQ, shipping policy and store locator — four pages, all currently 404. These sit directly in front of a subscription decision.
- 2

UNDER AN HOUR

Settle two settings: the double container and the pixel switch

Confirm which of GTM-57TDVNH / GTM-P4DXD97J is live and merge the tags; then check why the store config reads meta_pixel_enable: false. Duplicate events and a disabled pixel both make every ROAS discussion unwinnable.

3

HALF A DAY · BIGGEST SINGLE WIN

Join the app and the website in one report

Bring app.sidsfarm.com signups and website orders into a single weekly view so subscription growth is measured once, on one number.

NEXT STEP

Happy to walk through any of this on a short call.

7095024220

Nothing here requires new tooling. The first items are configuration, not rebuilds.

ABOUT THIS REPORT

Prepared by Smart Pursuit for Sid's Farm. Every figure was read from a public surface on 3 October 2026 — the Google Ads Transparency Center, the Meta Ad Library, and the brand's own website and published pages.

HOW TO CHECK IT

Each finding quotes the raw measurement above it. Ad counts can be re-checked by domain in the Google Ads Transparency Center (region: India), and tag IDs by opening the site and searching the page source. Spend, ROAS and CPA are private to the advertiser, so they are marked unavailable rather than estimated.
