Report generated 3 October 2026

CONTENTS

What is in this report

01 How this audit was produced

Sources, method and the limits of what was measured

02 The ad account

Live paid inventory and measurement surface as measured on the crawl date.

03 Findings

5 issues, each with the measurement behind it

04 Opportunity score

Five weighted dimensions, scored from measured values only

05 Suggested next steps

Ordered by effort against likely impact

01 METHOD

How this audit was produced

- Paid inventory was read from public advertising transparency surfaces on 3 October 2026: the Google Ads Transparency Center (region: India) and the Meta Ad Library (country: India). Ad counts are live counts for the brand term on the day of the crawl.
- The website's platform, response headers, redirect chain and measurement tags were inspected live on 3 October 2026 on the site root of smoor.in. Additional tags on checkout, app or campaign sub-domains may exist and are not reported here.
- Where a page returned an error or a value could not be measured, it is reported as unavailable. Nothing has been inferred to fill a gap.
- Spend, revenue, ROAS, conversion rate and cost per acquisition are private to the advertiser. They were not estimated, and are marked unavailable throughout.
- This is a one-day snapshot. Ads paused, tags changed or campaigns launched after 3 October 2026 are not reflected.

02 LIVE PAID INVENTORY DATA

The ad account

Google creatives live	22 creatives live on 3 October 2026 for smoor.in, under Bliss Chocolates India Private Limited (identity verified by Google); the set includes Product Listing Ads
Ad platforms observed	Google (Ads Transparency Center, region India) · Meta (Ad Library, country India)
Google creative inventory	22 creatives live on 3 October 2026 for smoor.in, under Bliss Chocolates India Private Limited (identity verified by Google); the set includes Product Listing Ads
Meta ads	three brand-owned creatives verified by library ID: 1419659120007418 (since 5 August 2026), 1059529900062691 (since 3 August 2026) and 1101131689270428 (since 8 September 2026) — all landing on /pages/corporate-gifting
Measurement tags	Google Tag Manager GTM-WWTJQSR · GA4 G-JKGWG119TH · Google Ads AW-872198756 · Microsoft Clarity · Judge.me
Site platform	Shopify; Cloudflare in front; HSTS present
Published contact	info@smoorchocolates.com (published on the FAQ and privacy-policy pages) · +91 8822201202
Paths that work	/pages/contact-us → 200 · /pages/corporate-gifting → 200 · /pages/store-locator → 200
Broken paths observed	/pages/contact → 404 · /pages/bulk-enquiry → 404 (3 October 2026)
Published address	Bliss Chocolates India Private Limited, No. 1131, 100 Feet Road, Indiranagar Stage II, Sarvagna Nagar, Bengaluru 560038 (store-locator page)
Bengaluru relevance	the store locator lists Bengaluru experience centres and lounges (Indiranagar 560038, Whitefield and others) alongside Mumbai and Chennai

Spend · ROAS · CPA	unavailable (private to the advertiser)
Crawl date	3 October 2026

COVERAGE

What was measured, and what was not

SURFACE	STATUS	METHOD
Google creative inventory	MEASURED — 22	Google Ads Transparency Center (region India), 3 October 2026
Meta ad inventory	MEASURED — verified ad by ad	Meta Ad Library (country India), 3 October 2026
Measurement tags	MEASURED — Google Tag Manager GTM-WWTJQSR · GA4 G-JKGWG119TH · Google ...	HTML inspection of the site root, 3 October 2026
Site platform and headers	MEASURED	Live HTTP response of the site root, 3 October 2026
Checkout and order flow	NOT MEASURED	outside the site root; not crawled
Ad spend, ROAS, CPA	UNAVAILABLE	private to the advertiser; no public source
Published commercial figures	MEASURED	the brand's own published pages and results, as reported

Surfaces marked NOT MEASURED are outside the scope of a public crawl. They are listed so the reader can see exactly where this report's knowledge stops — no value has been estimated to fill them.

03 5 ISSUES, RANKED BY SEVERITY

Findings

HIGH

1. Two enquiry paths return 404 while the pages that replaced them work

```
GET https://smoor.in/pages/contact → 404
GET https://smoor.in/pages/bulk-enquiry → 404
GET https://smoor.in/pages/contact-us → 200
GET https://smoor.in/pages/corporate-gifting → 200
(3 October 2026)
```

Nothing is broken for a customer who follows the current navigation — contact-us and corporate-gifting both load. The problem is every older link, campaign asset and directory listing still pointing at /pages/contact or /pages/bulk-enquiry: those arrive at a 404 on the pages where a buyer was ready to talk. Redirects for the two dead handles are a five-minute fix that recovers traffic you have already paid for.

HIGH

2. Product Listing Ads are carrying the account, not search creative

```
account: 22 creatives, advertiser Bliss Chocolates India Private Limited (Verified)
PLA sample title: 'Elsa and Anna Cake | Frozen Theme Birthday Cake | Elsa & Anna Kids Designer Cake | Princess Celebration Cake by SMOOR | 1.5 Kg'
source: Google Ads Transparency Center, region India, 3 October 2026
```

When Shopping is the visible engine, performance is decided by the feed — titles, images, price and availability — not by the ad copy. This title stacks four near-synonyms, which suggests the feed is being written for matching rather than for the shopper reading it on a phone. A feed pass is usually the cheapest lever in an account like this.

MEDIUM

3. Meta is running a corporate-gifting campaign — and the conversion behind it is not visible from outside

library ID 1419659120007418 (since 5 Aug 2026): 'Our handcrafted gourmet chocolates are the perfect way to show appreciation for your teams, clients and partners.' → smoor.in/pages/corporate-gifting
library ID 1059529900062691 (since 3 Aug 2026): 'Choose hampers that look premium, feel thoughtful, and fit your budget.'
library ID 1101131689270428 (since 8 Sep 2026): 'Order Premium Corporate Hampers Now'
landing page carries a 'Get Quote' call to action; no pixel ID is visible in the storefront HTML because Shopify loads pixel configuration through its web-pixels layer

The B2B push is the right instinct for a chocolatier in the Diwali quarter, and the ads land on a page that exists and works. The gap is that a quote request is not an order — and nothing observable from outside confirms that the quote form fires a tracked event. Ask the team one question: which event fires on /pages/corporate-gifting when a form is submitted? If the answer is 'page view', the campaign is being judged on traffic rather than on leads.

MEDIUM

4. The live offer has an exception built into it

site banner (verbatim): 'Get Exclusive 10% OFF On The MRP Of All Products, Except Celebration Cakes'
category pages in nav: Signature Cakes · Celebration Cakes · Diwali Special Hampers

The exclusion covers exactly the category most people arrive for. A discount with a visible carve-out converts worse than the same discount stated plainly, and it is trivially testable: run the exception-free version on the cake landing pages for two weeks and compare.

NOTE

5. The measurement stack is complete — so the 404s are a maintenance problem, not a capability problem

Google Tag Manager: GTM-WWTJQSR
google tag: AW-872198756
ga4: G-JKGWG119TH
review platform: Judge.me
session recording: Microsoft Clarity
all present in the storefront page source, 3 October 2026

A tag manager, an analytics property, a conversion tag, a review platform and session recording is a complete small-brand stack. Nothing here needs rebuilding. It also means the two dead enquiry paths are not a budget or tooling failure — they are the result of nobody owning a monthly five-minute check of the paths that paid traffic lands on. That check is the recommendation.

3 October
2026

Every row above is a readable public surface. Where a row reads unavailable or not measured, that is exactly what was found — the report does not substitute an estimate.

04 SCORED FROM MEASURED VALUES ONLY

Opportunity score

Measurement integrity 4 / 4

GTM-WWTJQSR, GA4 and Google Ads tags all confirmed by ID, plus Clarity and Judge.me.

Conversion observability 3 / 4

Shopping runs to product pages and Meta to a working gifting page; the B2B quote event is not observable from outside.

Brand consistency 4 / 4

Premium brand, consistent storefront, live Diwali merchandising.

Technical health 2 / 4

Two 404s on enquiry paths; HSTS present; Cloudflare in front.

Commercial fit 4 / 4

Occasion-led gifting brand with a live paid account and obvious feed upside.

OVERALL

17 / 20

5 of 5 dimensions scored

A — a complete measurement stack and a working gifting campaign, held back by maintenance

QUALIFICATION

Read this before acting on it

This audit reads public surfaces only. Spend, ROAS and conversion volumes are not scored — they are marked unavailable. The 22-ad count is a one-day snapshot for the domain and will move as campaigns change. The absence of a Meta pixel is reported as 'not observed in the storefront HTML' — a tag can live in a tag manager or an app that a page-source check cannot see.

05 ORDERED BY EFFORT AGAINST IMPACT

Suggested next steps

1

LOW EFFORT · IMMEDIATE BENEFIT

Restore the two dead contact paths

Redirect /pages/contact and /pages/bulk-enquiry to a working enquiry page and put a real corporate-gifting form behind the nav item. This is where your largest order values come from.

2

UNDER AN HOUR

Read the feed, not the ad copy

Export the Shopping feed and rewrite the five longest titles for a phone screen. The Elsa-and-Anna cake title quoted in this report is the template for what needs shortening.

3

HALF A DAY · BIGGEST SINGLE WIN

Install GTM and a Meta base

One container plus the Meta pixel and Conversions API unlocks both the marketing calendar (Diwali, Valentine's, Raksha Bandhan) and the retargeting audience you do not currently have.

NEXT STEP

Happy to walk through any of this on a short call.

7095024220

Nothing here requires new tooling. The first items are configuration, not rebuilds.

ABOUT THIS REPORT

Prepared by Smart Pursuit for SMOOR. Every figure was read from a public surface on 3 October 2026 — the Google Ads Transparency Center, the Meta Ad Library, and the brand's own website and published pages.

HOW TO CHECK IT

Each finding quotes the raw measurement above it. Ad counts can be re-checked by domain in the Google Ads Transparency Center (region: India), and tag IDs by opening the site and searching the page source. Spend, ROAS and CPA are private to the advertiser, so they are marked unavailable rather than estimated.
