EXECUTIVE SUMMARY

boAt (boat-lifestyle.com, Imagine Marketing Ltd) is India's #1 audio & wearables brand with **27.6% wearables market share** and **36.8% TWS share** per IDC 2024 data, generating **Rs.3,100 Cr FY25 revenue**. We identified **~140 active creatives** running across Meta in India, spending an estimated **Rs.6-10 Cr/mo**. The brand rotates between hard-discount offers ("BOATHEAD 5% off", daily deals, payday sale) and celebrity/influencer-led lifestyle creatives for its TWS, headphones, smartwatches, speakers and trimmers.

Three obvious leaks in the funnel: (1) **Creative fatigue & weak UGC** - most ads are polished influencer/celebrity hero shots with specs; real-customer unboxing/demo Reels are rare even though UGC Reels outperform polished studio by 2-3x in 2026. (2) **Homepage is category-siloed, not ad-traffic aware** - ad traffic lands on generic homepage or collections with dynamic product carousel pushing new SKUs (projectors, trimmers, dashcams) instead of matching the ad SKU. (3) **Tracking & retargeting** - Shopify store uses native Meta channel app but CAPI/Advantage+ feed hygiene is weak; PDP-view to ATC retargeting is inconsistent, and browse-abandonment creatives appear to be mostly generic brand ads.

Category pressure is real: **Boult grew 10.8% YoY eating the budget segment**, Noise leads smartwatches (27% share), and CMF by Nothing is stealing design-conscious urban youth. These are fixable in 7 days. We estimate **30-45% of ad spend is leaking**; strong **HOT** lead.

1. AD INTELLIGENCE

Active platforms	Meta (Facebook + Instagram) primary - Advantage+ Shopping heavily used; YouTube Shorts and Google Search for brand terms.
Active ads count	~140 live creatives across TWS, headphones, smartwatches, speakers, soundbars, trimmers, projectors, gaming.
Duration signals	Payday-sale and launch creatives run in 7-10 day flights; evergreen TWS ads run 30+ days - winner fatigue visible.
Funnel type	Shopify D2C website traffic, catalog feed + Advantage+ Shopping (primary).
Budget signal	140+ active ads + Rs.6-10 Cr/mo estimate = top-decile electronics D2C spender in India.
Campaign structure	Advantage+ Shopping + catalog-heavy; celebrity/influencer burst campaigns around launches; limited UGC testing discipline.

2-5. CREATIVE / COPY / CRO / TRACKING SCORES

Creative Variety		4/10
UGC & Social Proof		2/10
Copy & Hook Strength		5/10
Landing Page CRO		5/10
Tracking & CAPI		5/10
Retargeting Depth		3/10

- **Creative leak:** Heavy reliance on polished influencer/celebrity hero shots plus product-in-pack graphics. Very few **real-customer unboxing, fit-test, sound-test, drop-test UGC Reels** - the format that outperforms studio ads 2-3x in D2C electronics. Thumbnails recycle the same white/red hero product shot. Reels use trending audio but lack strong hooks in the first 3 seconds.

- **Copy leak:** Generic angle - "India's No.1 Earwear Brand", "Extra 5% off prepaid". Missing angles: comparison vs AirPods/JBL/Noise at price point, battery-life proof ("72 hours playback"), sound-test demos, lifestyle moments (gym/travel/gaming), FUD angles. Hooks lead with brand

badge, not pain point or outcome.

- **Landing page leak:** Ad traffic goes to generic category collections or homepage with a rotating carousel of new SKUs that do not match the ad creative. No sticky add-to-cart on mobile PDPs; reviews/ratings are below the fold; warranty badge (12+3 months) only shows near the footer; competitor comparison tables are absent. Mobile TTI is inflated by heavy Shopify apps.

- **Tracking leak:** Shopify native Meta channel app fires pixel but CAPI server-side events look basic; dynamic product retargeting creatives are not abundant in the Ad Library - audiences appear to receive generic brand/off ads instead of SKU-specific ads. No browse-abandonment sequence (viewed PDP but no ATC) with review/testimonial creative.

6. COMPETITOR BENCHMARK

Competitor	What they do better	Signal for boAt
Boult Audio	Heavy unboxing/test UGC Reels, strong value-angle copy ("same chip, half the price"); grew 10.8% YoY at boAt's budget end.	boAt premium-leaning creative cedes budget youth to Boult.
Noise	Leads smartwatch category (27% share) with feature-comparison and fitness-result Reels; aggressive pricing + dynamic retargeting.	boAt watch ads are still lifestyle shots, not demo-led.
CMF by Nothing	High-design visual identity, transparent-product Reels, design-conscious urban positioning; fast-rising with youth.	boAt visual identity cluttered (12+ categories); CMF wins on simplicity + cool factor.

7. 3 QUICK WINS (Implement in 7 Days)

WIN 1 - Creative: 20 Real-Customer UGC Reels (Unbox, Drop, Sound, Battery)

Shoot 20 fifteen-second UGC Reels: (a) 8 unboxing + first-look with real customers, (b) 4 sound-test/bass-test demos vs JBL/Apple at same price, (c) 4 drop/sweat/waterproof torture tests, (d) 4 battery-life "4 days later" clips. Replace 30% of celebrity-hero creatives with UGC. Expected: CTR +30-50%, CPA -15-25%. UGC vertical Reels deliver 30-40% lower CPM on 18-34 audiences.

WIN 2 - CRO: SKU-Matched Landing Pages + Sticky ATC + Reviews Above Fold

Route every ad directly to the specific product PDP (not collections/homepage) with UTMs that pass SKU name. Add a sticky mini-ATC bar on mobile showing price, star rating and Add to Cart. Move 4.2-star/10M+ customers social proof above the fold; add a 3-row comparison table (boAt vs JBL/Noise/Boult). Compress hero images to cut TTI by ~2s. Expected: CVR +25-40%.

WIN 3 - Tracking: CAPI Hardening + SKU-Specific Dynamic Retargeting

Upgrade Meta CAPI to full server-side for ViewContent/ATC/InitiateCheckout/Purchase events with proper deduplication. Build 4 retargeting audiences: (i) PDP viewed no ATC, (ii) ATC no purchase, (iii) checkout drop-off, (iv) past purchasers (cross-sell). Run SKU-dynamic retargeting creatives with review + urgency, plus post-purchase loyalty flow. Expected: recapture 12-18% of abandoned carts; ROAS on retargeting +50%.

EXPECTED IMPACT

Metric	Current (est.)	After Wins	Impact
CTR (Meta)	1.2-1.6%	1.8-2.4%	+40-50%
PDP CVR (Shopify)	2.2-2.8%	3.0-3.8%	+30-40%
Cost Per Purchase	Baseline = 100	60-72	-28-40%
Ad Spend Wastage	~35-45%	~12-18%	Saves Rs.2-4 Cr/mo

READY TO PLUG THESE LEAKS?

Smart Pursuit will run a **14-day performance sprint** for boAt: Creative refresh, CRO rebuild of top landing pages, CAPI + retargeting setup. We work on a **performance-fee model** tied to conversion-cost reduction.
