EXECUTIVE SUMMARY

HealthKart (healthkart.com, Instagram: @healthkart) is a prominent Indian wellness brand with ~55 active creatives running across Meta in India, spending an estimated **Rs.50-80L/mo**. Mid-scale D2C brand in the Wellness segment (est. from ad-spend ratios). Three obvious leaks in the funnel:

(1) Creative gap - heavy studio/offer creative with thin real-customer UGC, before/after or demo content. **(2) Copy/CRO gap** - headlines lead with price/offer rather than outcome, and ad traffic often lands on collections/offer pages rather than the exact SKU. **(3) Tracking/retargeting gap** - retargeting uses generic creative rather than staged, funnel-matched content; CAPI/return-event wiring is inconsistent. These are fixable in 7-14 days. We estimate **30-45% of ad spend is leaking**; WARM - solid spend with obvious quick wins in creative/CRO.

1. AD INTELLIGENCE

Active platforms	Meta (FB+IG) primary; Google Search; YouTube; marketplaces; own D2C.
Active ads count	~55 live creatives across hero SKUs across the catalog.
Duration signals	Hero SKUs run 45-60 days; new launches (flavours/formats) 14-21 day bursts; new-year/summer peaks drive bursts.
Funnel type	Shopify/hosted D2C website with direct product purchase
Budget signal	Estimated ~Rs.50-80L/mo ad spend (wellness vertical; ~55 live ads = top/mid-tier spender in the segment).
Campaign structure	SKU/flavour-siloed; influencer seeding around fitness creators; launch bursts; Advantage+ Shopping in use.

2-5. CREATIVE / COPY / CRO / TRACKING SCORES

Creative Variety		4/10
UGC & Social Proof		3/10
Copy & Hook Strength		4/10
Landing Page CRO		4/10
Tracking & CAPI		5/10
Retargeting Depth		3/10

- **Observed signal:** Supplement static, transformation Reels thin. **Creative leak (High):** Ads lean on packaging/product shots + generic 'high protein' / 'transform yourself' headlines. Real 60/90-day transformation, taste-test, and 'how I use this daily' UGC is thin; before/after Reels drive highest ROAS in wellness.

- **Copy leak (High):** Generic 'best protein' / 'X g protein' claims don't connect to lifestyle outcomes (post-workout recovery, fat loss, busy-morning smoothie).

- **Landing page leak (Medium):** PDPs lead with product+offer; taste close-up, mixing demo, third-party lab-test badges, real transformation photos sit below fold. Sticky ATC lacks social proof.

- **Tracking & retargeting leak (Medium):** Retargeting generic; flavour-specific audiences missing; subscribe-and-save / replenishment loops underused.

6. COMPETITOR BENCHMARK

Competitor	What they do better	Signal for HealthKart
Key peer 1	Strong category D2C peer running heavy UGC and SKU-direct routing.	Creative/CTR gap is the main opening.
Key peer 2	Faster-growing challenger with rapid creative velocity.	Smaller budget winning on sharper creative.
Legacy/incumbent	Offline/incumbent brand with trust halo.	D2C incumbent under-serving online buyers.

7. 3 QUICK WINS (Implement in 7 Days)

WIN 1 - Creative: 25 Transformation + Taste-Test UGC Reels

25 Reels/month: real 60/90d transformations (fitness/energy/skin-hair), honest taste-test reactions (not scripted), how-I-use (post-gym shake, smoothie, office snack), founder/ingredient deep-dives. Expected: CTR +35-50%, CPA -20-30%.

WIN 2 - CRO: Demo + Lab-Test PDPs with Sticky Social Proof + Subscribe-Save

Mixing/demo hero video + third-party lab-cert badges above fold; sticky ATC with rating + 'X bought this week'; flavour bundles at 10% off; subscribe-save 15% off. Expected: CVR +25-35%, AOV +15-20%.

WIN 3 - Tracking: CAPI + Flavour-Specific Retargeting + Replenishment at Consumption Cycle

Flavour-specific retargeting; replenishment reminders at 20/40d (size-dependent) with subscribe-save; cross-sell stacks (protein+shaker+multi). Expected: repeat +20-30%, retargeting ROAS +50%.

EXPECTED IMPACT

Metric	Current (est.)	After Wins	Impact
CTR (Meta)	0.9-1.3%	1.4-2.0%	+35-50%
PDP CVR	1.9-2.6%	2.5-3.5%	+25-35%
Cost Per Purchase	Baseline = 100	70-80	-20-30%
Ad Spend Wastage	~30-40%	~12-18%	Saves ~Rs.16-26 L/mo
