EXECUTIVE SUMMARY

Kaya Clinic (kaya.in, Instagram: @kayaclinic) is a prominent Indian clinic brand with ~50 active creatives running across Meta in India, spending an estimated **Rs.50-80L/mo**. Mid-scale D2C brand in the Clinic segment (est. from ad-spend ratios). Three obvious leaks in the funnel:

(1) Creative gap - heavy studio/offer creative with thin real-customer UGC, before/after or demo content. **(2) Copy/CRO gap** - headlines lead with price/offer rather than outcome, and ad traffic often lands on collections/offer pages rather than the exact SKU. **(3) Tracking/retargeting gap** - retargeting uses generic creative rather than staged, funnel-matched content; CAPI/return-event wiring is inconsistent. These are fixable in 7-14 days. We estimate **30-45% of ad spend is leaking**; WARM - solid spend with obvious quick wins in creative/CRO.

1. AD INTELLIGENCE

Active platforms	Meta (FB+IG) primary with lead forms + WhatsApp CTA; Google Search for treatment/doctor near-me; local inventory ads; retargeting to lead-openers.
Active ads count	~50 live creatives across hero SKUs across the catalog.
Duration signals	Evergreen treatments run 45-60 days; bridal/seasonal offers run 2-4 week bursts; new clinic launches get geo bursts.
Funnel type	Lead forms + WhatsApp / callback booking primary
Budget signal	Estimated ~Rs.50-80L/mo ad spend (clinics vertical; ~50 live ads = top/mid-tier spender in the segment).
Campaign structure	Treatment-siloed campaigns; offer-led bursts; location-targeted by clinic; lead-form/WhatsApp primary; creative mostly static-offer.

2-5. CREATIVE / COPY / CRO / TRACKING SCORES

Creative Variety		4/10
UGC & Social Proof		3/10
Copy & Hook Strength		4/10
Landing Page CRO		4/10
Tracking & CAPI		4/10
Retargeting Depth		3/10

- **Observed signal:** Derm procedures lack demo Reels, WhatsApp follow-up slow. **Creative leak (High):** Ads lean on offer ('50% off first sitting', 'free consultation') and doctor-portrait static frames. Treatment-journey educational Reels (how it works, PRP process, day-by-day recovery) are thin. Meta prohibits dramatic before/after in medical, but educational + soft-progress content is allowed and drives 2-3x higher lead quality.

- **Lead form leak (High):** Primary CTA is a generic 'Book Free Consultation' with name+phone, no qualifying questions (concern, timeline). Sales teams burn cycles on tire-kickers. WhatsApp routes to generic numbers with 2hr+ reply SLAs.

- **Tracking leak (Medium):** Lead-to-consultation-attended and treatment-purchased events rarely sent back; CAPI is typically just form-submit so algorithm optimizes volume not quality. Multi-location brands serve generic creative vs nearest-clinic dynamic.

- **Retargeting leak (Medium):** Retargeting creative is offer-generic; FAQ/objection-handler sequences (pain, downtime, cost, safety, doctor creds) for 7-21d consideration missing. Leads not called within 30 min - the highest-conversion window.

6. COMPETITOR BENCHMARK

Competitor	What they do better	Signal for Kaya Clinic
Key peer 1	Strong category D2C peer running heavy UGC and SKU-direct routing.	Creative/CTR gap is the main opening.
Key peer 2	Faster-growing challenger with rapid creative velocity.	Smaller budget winning on sharper creative.
Legacy/incumbent	Offline/incumbent brand with trust halo.	D2C incumbent under-serving online buyers.

7. 3 QUICK WINS (Implement in 7 Days)

WIN 1 - Creative: 20 Educational + Soft-Journey Reels

20 Meta-compliant Reels/month: doctor explains treatment (safety/downtime), first-person day-of/day-3/day-7 patient experience vlogs (no dramatic before/after), FAQ clips (does it hurt, permanent, who avoid), clinic-tour/behind-the-scenes. Replace 40% offer static. Expected: CPL -15-25%, lead quality +30%.

WIN 2 - CRO: Qualified Lead Forms + WhatsApp Business API with 5-min Routing

Higher-Intent forms with 1 qualifying MCQ (primary concern/timeline); auto-route WA responses to the correct clinic with 5-min SLA via WA Business API+CRM; auto-reply with doctor profile+clinic rating+address. Expected: lead-to-consult show-rate +30-50%.

WIN 3 - Tracking: CAPI to Consultation-Attended + Treatment-Purchased + Geo-Routed Creative

Fire CAPI for FormSubmit/ConsultBooked/ConsultAttended/TreatmentPurchased. Dynamic creative by nearest clinic; 3 retargeting layers (1-7d doctor+FAQ, 7-21d offer+proof, 21-45d bridal/seasonal urgency). <30-min lead callback SLA. Expected: cost-per-paying-patient -25-40%.

EXPECTED IMPACT

Metric	Current (est.)	After Wins	Impact
CPL	Baseline = 100	75-85	-15-25%
Lead-to-consult show-rate	30-40%	45-60%	+30-50%
Cost Per Patient	Baseline = 100	60-75	-25-40%
Ad Spend Wastage	~30-40%	~12-18%	Saves ~Rs.16-26 L/mo

READY TO PLUG THESE LEAKS?

Smart Pursuit will run a **14-day performance sprint** for Kaya Clinic: Creative refresh, CRO rebuild of top landing pages, CAPI + retargeting setup. We work on a **performance-fee model** tied to conversion-cost reduction.
