EXECUTIVE SUMMARY

Licious runs one of the largest paid footprints we have audited in Indian food D2C: ~300 live Google Ads creatives under Delightful Gourmet Pvt Ltd, plus a Meta presence we verified live (Library ID 983369480870934, running since 15 Apr 2026). The product story is excellent - 'caught in small boats', 'never frozen', '0-4C from source to store'. The gap is where the money lands: the live Bengaluru Meta ad routes traffic to licious.in/store-locator, and Google spend is spread across a very wide creative base - while FY25 closed at INR 795 Cr revenue with a INR 218.3 Cr net loss. The three fixes below make the existing spend convert harder; they do not ask for a bigger budget.

1. AD INTELLIGENCE

Google Ads (verified)	~300 live creatives under Delightful Gourmet Pvt Ltd - brand, category and Local store ads (we captured e.g. 'Licious Neo Town Electronic City' store-level ads).
Meta / Facebook (verified live)	Active ads confirmed in Meta Ad Library - Library ID 983369480870934, first seen 15 Apr 2026. This is a sustained flight, not a test.
Meta copy angle	Cold-chain trust stack: 'Your favourite Fish & Seafood', 'Caught in small boats', 'No added chemicals', 'Never frozen', 'Maintained at 0-4C from source to store' - plus a Kannada-language hook for Bengaluru.
Live destination	licious.in/store-locator?city_name=Bengaluru&city_id=1 - the click lands on a city/store picker, one full step before any product or price.
Market context	FY25 revenue INR 795 Cr, net loss INR 218.3 Cr; ~USD 490M raised; IPO reportedly deferred to FY27-28. Efficiency is the board-level conversation right now.

2-5. CREATIVE / COPY / CRO / TRACKING SCORES

Creative Variety		7/10
UGC & Social Proof		5/10
Copy & Hook Strength		8/10
Landing Page CRO		4/10
Tracking & CAPI		6/10
Retargeting Depth		6/10

- **Destination leak (highest cost):** the verified live Meta ad for Bengaluru sends clicks to the store-locator. Every extra step between ad and cart costs conversion - and this is the single most expensive step you can add to a food ad, because freshness intent decays in seconds. Fix: deep-link to the SKU page with city pre-selected, keep the locator as a secondary link.

- **Spend spread:** ~300 creatives including a large agency-run Local store-ad layer (Freeflow is not the buyer here - Delightful Gourmet is the verified advertiser). With this volume, budget is being thinned across many assets and geos instead of concentrated on the SKU/geo clusters that carry the cold-chain promise best.

- **Promise not carried into the landing:** 'Never frozen' and '0-4C' are your strongest assets - they should be the hero of the destination page, not just the ad. The locator page does not carry them.

- **Measurement risk:** with Meta + Google + Local store ads running together, if CAPI / Enhanced Conversions are not clean, Smart Bidding optimises on partial signal - you pay more per order without a visible reason.

6. COMPETITOR BENCHMARK

FreshtoHome / Zappfresh	Category landing pages with same-day delivery proof above the fold.	Deep-link ad traffic to category pages (fish / chicken / mutton) with delivery-slot proof, not a locator.
-------------------------	---	---

Country Delight (adjacent subscription model)	Subscription-first funnel; retention mechanics pull users back weekly.	Licious already offers subscription - surface it inside the ad landing path and in retargeting.
Quick-commerce counters	meat	Set a 10-minute delivery expectation inside the app.
		Do not fight on speed. Win on cold-chain trust and source story - make that the landing hero.

7. 3 QUICK WINS (Implement in 7 Days)

WIN 1 - CRO: Route meta clicks to the product page, not the locator
 Rewrite the 5 highest-spend Bengaluru Meta ads to land on the SKU page with city_id=1 pre-set and the locator as a secondary CTA. Keep UTMs identical so the comparison stays clean for 14 days.

WIN 2 - Creative: Systemise the cold-chain proof
 Take the assets that already work ('small boats', 'never frozen') and build a repeatable 3-format system: 15s cold-chain proof Reel, 15s source-story Reel, 15s offer card. Refresh weekly from one shoot day instead of ad-hoc creatives.

WIN 3 - Tracking: Meta CAPI + Enhanced Conversions
 Audit server-side events end to end, dedupe browser/server, and pass order value. If Smart Bidding sees full signal, the same spend buys more carts - before any creative change.

EXPECTED IMPACT

Metric	Current (live)	After Wins (est.)	Impact
Ad-to-cart steps	Ad -> store-locator -> product	Ad -> product page (city preset)	Removes the costliest drop-off
Landing conversion	Trust hooks proven, weak destination	Same hooks, product-page destination	+20-35% conversion on same spend
Creative refresh rate	High volume, ad-hoc	Weekly 3-format system	Lower fatigue, lower CPA
Signal quality	Multi-channel, unclear dedupe	Clean CAPI + Enhanced Conversions	Better Smart Bidding efficiency

AUDIT BASIS - LIVE DATA CHECKED ON 02 OCT 2026

- Google Ads Transparency (region IN): ~300 live creatives under Delightful Gourmet Pvt Ltd, incl. Local store ads (re-verified 02 Oct 2026).
- Meta Ad Library: Library ID 983369480870934 live since 15 Apr 2026; destination [licious.in/store-locator](#) (Bengaluru) verified.
 - [licious.in](#): contact + store-locator pages (talktous@licious.com, 1800-4190-786, Domlur, Bengaluru 560071).
- Public FY25 results coverage: revenue INR 795 Cr, net loss INR 218.3 Cr; funding ~USD 490M; IPO timing reported.

READY TO PLUG THESE LEAKS?

Smart Pursuit will run a **14-day performance sprint** for Licious: Creative refresh, CRO rebuild of top landing pages, CAPI + retargeting setup. We work on a **performance-fee model** tied to conversion-cost reduction.
