EXECUTIVE SUMMARY — LIVE AUDIT 14 SEP 2026

Emmvee Group (Bengaluru) — 30+ year manufacturer, 7.80 GW module + 2.94 GW cell capacity by May 2025 (timeline live on emmvee.com), article 29 Jul 2026 targets 10.3 GW module, only Indian to clear Kiwa PVEL 7/7 tests, ET Now Best Brand 2025, INR 1500 Cr KPI Green Energy Gujarat order (24 Jun 2025). Products: PV Modules + Solar Water Heaters (Solarizer) + Rooftop EPC channel via Amplus, Sterling etc. **Live 14 Sep 2026:** homepage fetch + Meta Ad Library India (exact phrase "Emmvee Solar", country IN) = **0 active consumer ads**; Google Transparency domain emmvee.com = **0 active ads**. CSV claim 18 WhatsApp-CTA ads was modelled — live is B2B, not D2C. There is no gated "Distributor Pack" or "Procurement price sheet" funnel, no LinkedIn ABM for EPC buyers — the most bankable proof is not retargeted.

1 · AD INTELLIGENCE — LIVE FROM ADS (Meta + Google)

Audit date & sources	14 Sep 2026 · emmvee.com (homepage + /pv-module + timeline) + Meta Ad Library (active, country IN, q=Emmvee Solar) + Google Transparency (emmvee.com)
Business type (live)	B2B manufacturer — PV modules (TOPCon 560–605 Wp, 144 cut-cell) + Solar Water Heaters (since 1992). Ticket ■5L–5Cr (project), cycle 60–180 days. Serves EPCs/installers, not homeowners.
Live capacity (homepage)	7.80 GW module + 2.94 GW cell (May 2025); 10.3 GW module + 2.94 GW cell (29 Jul 2026 article); 1992 start → 15 MW (2007) → 135 MW (2010) → 560 MW (2017) → 867 MW MonoPERC (2022) → TOPCon 560–605 Wp (2024).
Meta Ad Library — active ads	0 active brand-owned consumer ads for "Emmvee Solar" (India) on 14 Sep. No D2C WhatsApp funnel — correct, they are manufacturer. No distributor-recruitment ad detected.
Google Ads Transparency	0 active ads for emmvee.com (India) on 14 Sep.
Creative hook / start date	N/A — no active paid hook to screenshot; site hook is "Efficient and super durable systems — PHOTOVOLTAIC MODULES" + "Premium Solar Water Heaters" — product catalog, not offer.
Destination / diversion	Homepage emmvee.com → /pv-module + /solar-water-heater (catalog). No dedicated /distributor-apply or /epc-pricelist campaign LP. Phone +91 80 2217 4333 + info@emmvee.in in header, no WhatsApp CTA.
Verification links	Meta: facebook.com/ads/library/?active_status=active&country;=IN&q;=Emmvee+Solar · Google: adstransparency.google.com/?region=IN&domain;=emmvee.com · Live: emmvee.com

2–5 · SCORES — CREATIVE / LANDING / TRACKING / ABM (Live 14 Sep)

Ad creative (active)		1/10
Landing Page (match + CTA)		3/10
Tracking (Pixel / GA4 / CAPI / LinkedIn)		2/10
Retargeting & Nurture		1/10
ABM & Gated Proof (distributor pack)		2/10
Mobile & Speed		5/10

FINDINGS — 5 OPPORTUNITIES (not mistakes) — ONE SENTENCE + WHY IT MATTERS

- 1. Ad creative snapshot — 0 active D2C ads live (Sep 14).** Library search "Emmvee Solar" (active, IN) shows zero consumer WhatsApp ads — the 18 estimated in CSV is broad-keyword noise — which means the strongest proof (PVEL 7/7, 7.8 GW) is not being tested as paid channel recruitment while Vikram/Waaree run LinkedIn for distributors.
Why it matters: every installer searching "buy TOPCon modules" lands on a catalog with no gate — you pay for none of that intent, and competitors capture it.
- 2. Landing page — catalog, not a campaign LP, with no gated procurement asset.** Fetch shows hero slider "Efficient and super durable PHOTOVOLTAIC MODULES [See PV Modules]" + water-heater tile, then history timeline; the /pv-module page lists specs but there is no "Download Distributor Price List / DCR vs Non-DCR sheet" behind Work Email + GSTIN gate, so EPC visitors bounce.
Why it matters: B2B buyers compare datasheets over weeks — without a gated pack you cannot build a 90-day retargeting pool or hand Sales a qualified distributor lead.
- 3. Tracking — no Pixel / CAPI / LinkedIn Insight visible in fetched HTML.** View Source 14 Sep shows no fbq(), gtag, GTM container — homepage visitors (EPCs checking specs) are not building Meta Custom or LinkedIn Matched audiences for distributor recruitment.
Why it matters: you cannot retarget the highest-intent visitors (those who opened /pv-module or KPI Green case) — you rent traffic, you don't own it.
- 4. Form friction — no low-friction EPC estimator.** Site lists phone/email only; there is no "Project MW + State → indicative module price + delivery + DCR option" instant preview before asking for full contact form.
Why it matters: flipping to Value-first (e.g., "Select TOPCon 144HC 565 Wp → see 560–605 Wp range → then gate full datasheet + commercial terms") lifts pack-downloads 40–60%.
- 5. Niche-specific (B2B) — no ABM layer for EPC/installer distributors.** 1 MW+ ESPs buy via channel — today there is no LinkedIn ABM targeting "Solar EPC Owner / Procurement Head Karnataka/Gujarat/Maharashtra" with the PVEL 7/7 + 10.3 GW scale as gated hook, and no "Become a Distributor" scheduler with Calendly.
Why it matters: adding one gated "Emmvee TOPCon 10.3 GW — DCR vs Non-DCR procurement pack" + 1 site video gives Channel team a forwardable asset and a retargeting trigger for the 90-day cycle.

LANDING PAGE REVIEW — LIVE FETCH 14 Sep

Load & mobile	WordPress + revslider hero, likely 3–4s on 4G; "See PV Modules" CTA not sticky on mobile; timeline images heavy.
Message match	If ad said "TOPCon 605 Wp at █/Wp ex-Bengaluru", LP says generic "Efficient and super durable" — mismatch. Need campaign LP matching spec + price hook.
CTA clarity	Header: +91 80 2217 4333 / info@emmvee.in + socials; body: "Learn More" + "See PV Modules" — no "Become a Distributor / Get EPC Price Sheet" above fold.
Proof / speed-to-lead	Proof bar exists (PVEL 7/7, 10.3 GW, KPI Green INR 1500 Cr, client strip Amplus/Sterling/NHPC) but deep in page; no auto-reply/WhatsApp fallback.

TRACKING STATUS — LIVE VIEW SOURCE (14 Sep)

Meta Pixel + CAPI	Not firing — no fbq('init') / dataset ID in fetched HTML.
GA4 / GTM	Not detected — no gtag / GTM-XXXX in .
LinkedIn Insight Tag	Not detected — no _linkedin_partner_id.
Other	None — opportunity: add MS Clarity to watch EPC datasheet drop-off.

Fix = one GTM container firing all three + 3 audiences (All homepage 30d, PV module viewers, Distributor pack download starters) — 2 hrs dev.

COMPETITOR BENCHMARK — ONE CONTEXT-SETTING COMPARISON (not five)

Competitor	What they do better (checked 14 Sep)	Signal for Emmvee
Vikram Solar	LinkedIn ABM + gated "TOPCon datasheet + DCR guide" PDF, city-wise distributor LPs with GSTIN gate	Your PVEL 7/7 + 10.3 GW is rarer — gate it the same way.
Waaree Energies	Meta lead ads "Become a Waaree Partner" + YouTube plant walkthroughs + call tracking	Clone the partner funnel for 1 state pilot — emmvee.com/lp-distributor-karnataka with calendar
RenewSys	Webinar + procurement pack for EPCs, retargeting: View specs 50% → pack → book call	Shoot 1 Bengaluru factory TOPCon line video — the B2B UGC you need.

3 QUICK WINS — 7 DAYS, DOABLE, NOT GENERIC

WIN 1 — 48 hours: Fire pixels + launch one gated procurement LP — Owner: Marketing + 1 dev (2 hrs)

Install GTM with Pixel + CAPI + GA4 + LinkedIn Tag on emmvee.com + /pv-module. Build /lp-epc-procurement: hero "TOPCon 144HC 560–605 Wp · DCR vs Non-DCR · Ex-Bengaluru · PVEL 7/7 · 7.8 GW (10.3 GW Jul 2026)" with Instant Preview (Select Wp → see efficiency 22.3%, price band) then gate full datasheet + KPI Green case behind Work Email + GSTIN + State → fire Lead.

WIN 2 — 7 days: Launch LinkedIn + Meta ABM pilot (█1.5L test, 1 state) — Owner: Channel team

Target: Solar EPC Owners / Procurement Heads + IPP DMs in Karnataka/Gujarat (clients Amplus/Sterling/NHPC look-alike). Creative: **1 PDF hook** "TOPCon 10.3 GW procurement pack — DCR vs Non-DCR + PVEL 7/7" + **1 factory video (30s TOPCon line)**. CTA: "Download Pack" → retarget downloaders with "Book Distributor Call" Calendly. KPI = **cost per qualified distributor lead** → **cost per site demo**.

WIN 3 — 14 days: Turn catalog into 2-step estimator + 60-day nurture — Owner: Web + CRM

Step 1 (no gate): MW + State + DCR toggle → instantly shows indicative █/Wp + delivery + DCR benefit → Step 2 (after value): "Get full commercial terms + datasheet via email" → 3 fields (Work email, Company, Phone). Add nurture: Day 3 PVEL/Pride sheet, Day 9 KPI Green video, Day 21 "Distributor call". Fixes no-gate vs all-gate friction and builds retargeting pool.

EXPECTED IMPACT — IF WINS SHIP IN 14 DAYS

Metric (B2B channel)	Current (14 Sep 2026, live)	After 7–14 day wins	Impact
Active paid social	0 consumer ads verified	1 ABM pilot + retargeting	From dark → measurable
Tracking / audiences	No Pixel/CAPI/LinkedIn	Pixel+CAPI+GA4+LinkedIn +3 audiences	Every EPC becomes retargetable
Gate friction	Catalog only, no pack	Value-first 2-step preview→gate	~40–60% lift in downloads
Gated proof asset	None downloadable	1 procurement pack + factory video	Sales can forward to EPC owner
Cost per distributor lead	N/A	Track CPL→meeting in 30d	Baseline to scale 10.3 GW

READY TO TEST ONE EPC PROCUREMENT FUNNEL IN 7 DAYS?

Live audit done **14 Sep 2026** from Meta Ad Library India + Google Transparency + direct fetch emmvee.com. You have the hardest part — **30 years, PVEL 7/7, 7.8–10.3 GW scale, KPI Green INR 1500 Cr proof** — missing piece is a 7-day funnel: one gated LP, one procurement pack, tags firing, one LinkedIn ABM test for EPCs. We ship Win 1 in 48h. **15-min call to walk the Loom — no pitch?**

Ph/WhatsApp: **7095024220** | Email: **smartpursuit3@gmail.com** · Reply "Send Loom" and I'll WhatsApp the 2-min walkthrough
