EXECUTIVE SUMMARY — LIVE AUDIT 14 SEP 2026

Premier Energies Ltd (E-City, Hyderabad, since 1995) — integrated ****cell + module**** manufacturer, ****GEF Capital (Washington DC) backed****. **Live 14 Sep 2026:** premierenergies.com fetch shows **10.6 GW solar cells + 11.1 GW modules by FY 2026** (was 1.25GW+0.75GW 2021 → now 10x), products: ****Mono PERC 23.7% + TOPCon 25.2% cells, Mono PERC/TOPCon modules up to 23.2% (108–144 cells)****, 2 MW IPP Jharkhand 2012, NTPC ****611.04 MW DCR Bifacial**** order Rajasthan (NOKH). Also ****news 2026: 5.6 GW TOPCon fab commissioned Telangana****. **Meta Library "Premier Energies" (active, IN) → 0 active EPC lead ads;** Google `premierenergies.com` → **0 active EPC lead ads** — correct, they sell via DCR utility + channel.

1 · AD INTELLIGENCE — LIVE FROM ADS (Meta + Google)

Audit date & sources	14 Sep 2026 · premierenergies.com (homepage + news) + CBInsights/Tracxn + Meta Library (Premier Energies, active, IN) + Google Transparency
Business type (live)	Manufacturer — cells (PERC 23.7%, TOPCon 25.2%) + modules (PERC/TOPCon 23.2%) + IPP 2MW. Ticket 500 kW–100 MW channel, cycle 90–270 days. Backed GEF Capital.
Live capacity (homepage)	10.6 GW cells + 11.1 GW modules by FY2026; 5.6 GW TOPCon fab Telangana commissioned 2026; 30 yrs exp; DCR leadership; NTPC 611 MW DCR Bifacial NOKH Rajasthan.
Meta Ad Library — active ads	0 active for "Premier Energies" (India) 14 Sep — no consumer EPC creatives.
Google Transparency	0 active for premierenergies.com (India) 14 Sep.
Creative hook / start date	N/A — manufacturer hook is specs (TOPCon 25.2% / 23.2%) + DCR + NTPC 611MW, not subsidy.
Destination / diversion	premierenergies.com → Products (Cell/Module) → "Read More" → corporate. No /pm-surya-ghar campaign LP — correctly.
Verification links	Meta: facebook.com/ads/library/?active_status=active&country;=IN&q;=Premier+Energies · Google: adstransparency.google.com/?region=IN&domain;=premierenergies.com · Live: premierenergies.com

2–5 · SCORES — CREATIVE / LANDING / TRACKING / ABM (Live 14 Sep)

Ad creative (EPC relevant)		1/10
Landing Page (EPC match)		5/10
Tracking (Pixel / GA4)		5/10
Retargeting (channel)		2/10
Channel gated asset		2/10
Mobile & Speed		6/10

FINDINGS — 5 OPPORTUNITIES (not mistakes) — ONE SENTENCE + WHY IT MATTERS

1. Ad creative snapshot — 0 EPC lead ads (correct for MFR, Sep 14). Library empty for "Premier Energies" — the 53 Lead-Form ads model in CSV was broad — live is DCR/Bifacial specs and NTPC 611 MW trust, not PM Surya Ghar lead forms.
Why it matters: pitching a Meta CPL funnel here wastes BD as with Adani — pipeline is order-book channel, not forms.

- 2. Landing page — manufacturer + IPP, not a quote LP (as it should be).** Fetch shows About "Let's Go Solar 30 yrs" + E-City tech (TOPCon 25.2% line, half-cut bifacial) + Sustainability + Products carousels; there is no EPC quote calculator — correctly, because you ship cells/modules, not installs.
Why it matters: only performance angle is channel procurement, not homeowner CPL.
- 3. Tracking — likely enterprise firing, but not as channel funnel.** Likely GA4/GTM present for premierenergies.com but no gated channel events (ViewCellSpecs / DownloadTOPConSheet / ChannelLead) in fetched HTML snippets.
Why it matters: if you ever run "Become Premier Channel" ABM, you'd need segmented audiences — currently not a funnel.
- 4. Form friction — no funnel, no gate (correct).** CTA is "Read More" → product pages vs gated datasheet behind GSTIN — fine now, not a leak unless channel asks.
Why it matters: no action needed unless channel team wants Meta testing — then fix the gate.
- 5. Niche-specific — SKIP cold pitch; if at all, pitch DCR channel.** 1 MW+ ESPs buy via ALMM/DCR + NTPC tenders — any audit should say "do not DM for ■78k residential; if at all, build LinkedIn ABM for cell procurement with NTPC 611 MW DCR as hook."
Why it matters: saves BD week — this is LOW pitch-fit and should be deprioritized in 36-40 for MYSUN/Zunsolar.

LANDING PAGE REVIEW — LIVE FETCH 14 Sep

Load & mobile	Heavy product/IPP carousels — ~2.5–3s; mobile not EPC sticky (correct for mfg).
Message match	No EPC ad → no mismatch. Mfg message is TOPCon 25.2%/23.2% + DCR + NTPC 611MW — aligned.
CTA clarity	Generic "Read More" → Cell/Module pages — no distributor/partner funnel unless asked.
Proof / speed-to-lead	30 yrs + GEF + 10.6/11.1 GW + NTPC 611MW DCR + Great Place To Work 5yrs — Tier-1 trust, but not packaged as gated channel pack.

TRACKING STATUS — LIVE VIEW SOURCE (14 Sep)

Meta Pixel + CAPI	Unknown/enterprise — not verified as EPC funnel.
GA4 / GTM	Likely present — large group site.
LinkedIn Insight	Not detected as channel funnel — not needed unless piloting.
Other	Chatbot not needed — DCR spec is the asset.

No fix needed for residential CPL. If piloting channel: add 3 events (ViewCellSpecs / DownloadTOPCon / ChannelLead) + LinkedIn Tag — 2 hrs.

COMPETITOR BENCHMARK — ONE CONTEXT-SETTING COMPARISON (not five)

Competitor	What they do better (checked 14 Sep)	Signal for Premier
Waaree / Adani	10 GW-scale channel recruitment + gated TOPCon datasheets + PVEL proofs	Your NTPC 611MW DCR Bifacial + TOPCon 25.2% is the DCR proof they chase.
RenewSys	Cell + encapsulant integrated story	Your 10.6GW cells + 11.1GW modules is larger — gate it.
Premier order book	9.38 GW (58% cells 42% modules) per CBInsights 2026	Makes Meta CPL irrelevant — channel ABM is the only performance play.

3 QUICK WINS — 7 DAYS, DOABLE, NOT GENERIC

ADVISORY — Do not cold-pitch residential CPL here (save BD time) — Owner: BD filter

Per CSV pitch_fit **LOW** — in-house team, do not cold pitch and live 14 Sep confirms: 0 consumer ads, manufacturer 10.6/11.1 GW, order book 9.38 GW. Remove from daily DM queue and reallocate to HOT (Zunsolar/MYSUN). If channel asks, quote this note.

IF channel asks — 48h gated TOPCon/DCR LP (OPTIONAL) — Owner: Channel marketing

Only if asked: Build /channel-topcon-dcr: hero "TOPCon 25.2% cells / 23.2% modules — DCR Bifacial — NTPC 611 MW proof (NOKH) — ALMM" → gate datasheet behind Work Email + GSTIN. Not a must now.

IF piloting LinkedIn — 1 NTPC reel (OPTIONAL) — Owner: Content

Only if asked: 30s E-City TOPCon line + NTPC 611 MW overlay + 10.6/11.1 GW scale → LinkedIn ABM to procurement heads. KPI = channel lead. Otherwise, skip.

EXPECTED IMPACT — IF WINS SHIP IN 14 DAYS

Metric	Current (14 Sep 2026, live)	After advisory	Impact
Active consumer paid	0 active (correct)	Keep dark, save ■1.5L/mo	BD saves time

Landing LP	Mfg/IPP catalog	Keep — no EPC LP needed	No leak
Gate friction	Read More generic	Keep — optional GSTIN gate if channel asks	No change unless asked
Channel asset	None gated	Optional TOPCon DCR pack	Only if team requests
BD priority	36-40 includes this	De-prioritize — focus HOT	More replies / week

VERDICT — SKIP COLD PITCH FOR PREMIER 36-40? FOCUS ON ZUNSOLAR / MYSUN

Live audit 14 Sep 2026 confirms Premier Energies is a **manufacturer at 10.6 GW cells + 11.1 GW modules (NTPC 611 MW DCR)** with **0 consumer ads** — correctly. CSV marks **LOW — do not cold pitch** and we agree. Save credits for **Zunsolar (HOT), MYSUN (HOT), Shakti Pumps (seasonal)**. If channel ever wants a test, optional wins ship in 48h. **15-min call to re-prioritize 36-40?**
