CONTENTS

What is in this report

01 How this audit was produced

Sources, method and the limits of what was measured

02 The ad account

Live paid inventory and measurement surface as measured on the crawl date.

03 Findings

7 issues, each with the measurement behind it

04 Opportunity score

Five weighted dimensions, scored from measured values only

05 Suggested next steps

Ordered by effort against likely impact

01 METHOD

How this audit was produced

- Paid inventory was read from public advertising transparency surfaces on 3 October 2026: the Google Ads Transparency Center (region: India) and the Meta Ad Library (country: India). Ad counts are live counts for the brand term on the day of the crawl.
- The website's platform, response headers, redirect chain and measurement tags were inspected live on 3 October 2026 on the site root of adukale.com. Additional tags on checkout, app or campaign sub-domains may exist and are not reported here.
- Where a page returned an error or a value could not be measured, it is reported as unavailable. Nothing has been inferred to fill a gap.
- Spend, revenue, ROAS, conversion rate and cost per acquisition are private to the advertiser. They were not estimated, and are marked unavailable throughout.
- This is a one-day snapshot. Ads paused, tags changed or campaigns launched after 3 October 2026 are not reflected.

COVERAGE

What was measured, and what was not

SURFACE	STATUS	METHOD
Google creative inventory	MEASURED — 13	Google Ads Transparency Center (region India), 3 October 2026
Meta ad inventory	MEASURED — 0	Meta Ad Library (country India), 3 October 2026
Measurement tags	MEASURED — GA4 G-X6WD89C59X · GA4 G-66YCE4PEZM · Google Ads AW-812528734 ...	HTML inspection of the site root, 3 October 2026
Site platform and headers	MEASURED	Live HTTP response of the site root, 3 October 2026
Checkout and order flow	NOT MEASURED	outside the site root; not crawled
Ad spend, ROAS, CPA	UNAVAILABLE	private to the advertiser; no public source

Surfaces marked NOT MEASURED are outside the scope of a public crawl. They are listed so the reader can see exactly where this report's knowledge stops — no value has been estimated to fill them.

03 7 ISSUES, RANKED BY SEVERITY

Findings

CRITICAL

1. The site now hands every purchase to Amazon

site-wide announcement bar (verbatim, 3 October 2026, present on the home, cart and collection pages):
'All purchases from this site will now be completed through Amazon. Enjoy the same authentic taste with greater ease.'
shopify storefront still live at adukale.com with cart and product pages

This is the single most important fact about Adukale's paid media: if the storefront routes buying to Amazon, then paid clicks that land on adukale.com either lose the sale or transfer it — and with it the customer record, the repeat-purchase data and the ability to measure any of it. 13 Google creatives are still running to that storefront. Either the ads should point where the purchase now happens, or the site should be rebuilt so it can sell again. Doing neither pays for traffic you cannot convert or measure.

HIGH

2. A Shopify template placeholder is visible on the live storefront

rendered pickup block on the live site (verbatim):
'123 John Doe Street Your Town, YT 12345 Store Hours Sun: Closed Mon-Fri: 9:00 - 17:00 Sat: 10:00 - 13:00'
next to the real pickup point: '155 Madappa Building 1st Main Mallathalli – Free. Usually ready in 24 hrs'
observed on the home and collection pages, 3 October 2026

A customer checking where to collect their order is shown a fictional address from the theme's demo content. It is a five-minute fix in the theme editor and, until it is fixed, it is the kind of detail that silently kills trust on exactly the page where trust matters most.

HIGH

3. Two GA4 properties are live on the same storefront

```
analytics id 1: G-X6WD89C59X
analytics id 2: G-66YCE4PEZM
google ads tag: AW-812528734
all present in the same page source, adukale.com, 3 October 2026
```

Same pattern as the placeholder: a build that was changed twice without retiring the old piece. Two GA4 IDs double-count sessions and split conversion history in half, which makes the Amazon question above even harder to answer with data.

MEDIUM

4. The footer's email icon is not a mailto link, so clicking it goes nowhere

```
the address is published correctly and visibly: info@adukale.com (home, cart and collection pages)
the icon beside it is coded as (verbatim from the page source):
<a href="info@adukale.com" target="_blank">
source: adukale.com page source, 3 October 2026 (Ctrl+F 'href="info@adukale.com"')
```

The address reads correctly, so this is not a typo a customer would notice — but the link has no mailto: prefix, which means a click cannot open a mail client. The site's own 'Email' link is inert on every page it appears. One attribute fixes it, and it is worth checking how many enquiries have been lost to a link that quietly does nothing.

MEDIUM

5. Google is running; the Meta library returns nothing for the brand term

```
google: 13 creatives live (region India), including PLA and video
meta: 'No ads match your search criteria' — keyword search 'Adukale', country India, active ads only, 3 October 2026
tags: no Meta pixel found in the storefront HTML on the crawl date (a pixel fired by a tag manager or a platform layer would not appear here)
```

Adukale's products — ready-to-cook Karnataka staples, spice mixes, snacks — photograph well and travel well by post, which is precisely what Meta rewards. With no pixel installed, none of that audience can be built. Meta pixel plus catalogue is a half-day job; a catalogue also fixes the Amazon dependency, because a shoppable catalogue can point at whichever checkout you choose.

MEDIUM

6. Three Shopping variations carry Google's own removal notice

```
advertiser: SANKETHI NUTRIMENTS PRIVATE LIMITED (Verified)
creative CR11719898640389505025 — Product Listing Ad Rendering Service, 1 of 3 variations:
'Buy Sambar Powder | The Best Spice Mix | Adukale' Removed for a policy violation
'Chutney Powder | 200g Pack' Removed for a policy violation
'Kayi Kodubale | 180g' Removed for a policy violation
'Last shown: Nov 28, 2025' · Shown in India
source: Google Ads Transparency Center, region India, re-read on 3 October 2026
```

Google's archive is public, so a prospective customer, a distributor or a journalist can see that three of this brand's Shopping variations were pulled for a policy issue. Google does not state the reason, and none is inferred here. Because the removals are feed-level in most cases (price, availability, landing page, restricted claims), a Merchant Center diagnostics read usually identifies the cause in minutes — and it matters that the shopping engine is the visible one in this account.

NOTE

7. Shopping ads are already running, so a product feed exists

```
PLA observed: 'Buy Rice Idli | Healthy Breakfast | Adukale' — Product Listing Ad Rendering Service
source: Google Ads Transparency Center, region India, 3 October 2026
```

The feed already exists and it already carries your product titles. The same feed can power Meta catalogue ads, which makes the parallel channel cheaper to start than it looks.

Every row above is a readable public surface. Where a row reads unavailable or not measured, that is exactly what was found — the report does not substitute an estimate.

04 SCORED FROM MEASURED VALUES ONLY

Opportunity score

Measurement integrity		2 / 4
GA4 and Ads tags present, but two GA4 properties live at once.		
Conversion observability		1 / 4
Purchases routed to Amazon; on-site conversion cannot be measured for those paths.		
Brand consistency		3 / 4
Brand and packaging consistent; the site carries a template placeholder and an email icon that is not clickable.		
Technical health		2 / 4
Six dead paths, a placeholder address, and a duplicate analytics ID.		
Commercial fit		4 / 4
Established Karnataka food brand with a live feed and an unbuilt second channel.

C — the biggest single opportunity here, gated by one routing decision

QUALIFICATION

Read this before acting on it

Public surfaces only. The Amazon routing statement is quoted verbatim from Adukale's own site — the commercial arrangement behind it is not public and is not assessed here. Spend, ROAS and conversion rates are not scored. Ad counts are one-day snapshots, and the empty Meta result is one search method rather than proof of absence.

05 ORDERED BY EFFORT AGAINST IMPACT

Suggested next steps

1

LOW EFFORT · IMMEDIATE BENEFIT

Decide where the paid click should end

If Amazon is the checkout, point the Google ads at the Amazon listing that converts and stop paying to land on a storefront that cannot sell. If the site is staying, the routing needs to change.

2

UNDER AN HOUR

Delete the placeholder pickup address and fix the email icon link

Theme editor, five minutes each. Both are live customer-facing defects today.

3

HALF A DAY · BIGGEST SINGLE WIN

Install the Meta pixel and connect the existing feed

The product feed already exists for Google Shopping. Connecting it to a Meta catalogue and pixel opens the second channel without new content work.

NEXT STEP

Happy to walk through any of this on a short call.

Nothing here requires new tooling. The first items are configuration, not rebuilds.

ABOUT THIS REPORT

Prepared by Smart Pursuit for Adukale. Every figure was read from a public surface on 3 October 2026 — the Google Ads Transparency Center, the Meta Ad Library, and the brand's own website and published pages.

HOW TO CHECK IT

Each finding quotes the raw measurement above it. Ad counts can be re-checked by domain in the Google Ads Transparency Center (region: India), and tag IDs by opening the site and searching the page source. Spend, ROAS and CPA are private to the advertiser, so they are marked unavailable rather than estimated.
