CONTENTS

What is in this report

01 How this audit was produced

Sources, method and the limits of what was measured

02 The ad account

Live paid inventory and measurement surface as measured on the crawl date.

03 Findings

5 issues, each with the measurement behind it

04 Opportunity score

Five weighted dimensions, scored from measured values only

05 Suggested next steps

Ordered by effort against likely impact

01 METHOD

How this audit was produced

- Paid inventory was read from public advertising transparency surfaces on 3 October 2026: the Google Ads Transparency Center (region: India) and the Meta Ad Library (country: India). Ad counts are live counts for the brand term on the day of the crawl.
- The website's platform, response headers, redirect chain and measurement tags were inspected live on 3 October 2026 on the site root of organicmandya.com. Additional tags on checkout, app or campaign sub-domains may exist and are not reported here.
- Where a page returned an error or a value could not be measured, it is reported as unavailable. Nothing has been inferred to fill a gap.
- Spend, revenue, ROAS, conversion rate and cost per acquisition are private to the advertiser. They were not estimated, and are marked unavailable throughout.
- This is a one-day snapshot. Ads paused, tags changed or campaigns launched after 3 October 2026 are not reflected.

COVERAGE

What was measured, and what was not

SURFACE	STATUS	METHOD
Google creative inventory	MEASURED — 69	Google Ads Transparency Center (region India), 3 October 2026
Meta ad inventory	MEASURED — verified ad by ad	Meta Ad Library (country India), 3 October 2026
Measurement tags	MEASURED — GA4 G-MHKC4DNNH3 · Google Ads AW-16535163896 · Shopify with a ...	HTML inspection of the site root, 3 October 2026
Site platform and headers	MEASURED	Live HTTP response of the site root, 3 October 2026
Checkout and order flow	NOT MEASURED	outside the site root; not crawled
Ad spend, ROAS, CPA	UNAVAILABLE	private to the advertiser; no public source
Published commercial figures	MEASURED	the brand's own published pages and results, as reported

Surfaces marked NOT MEASURED are outside the scope of a public crawl. They are listed so the reader can see exactly where this report's knowledge stops — no value has been estimated to fill them.

03 5 ISSUES, RANKED BY SEVERITY

Findings

HIGH

1. You have a two-hour delivery promise and it is nowhere in the paid inventory

published promise (verbatim from the live site, 3 October 2026):
'2-hr delivery in Bengaluru, Hyderabad & Mysuru — ₹49 delivery charge on orders under ₹500, FREE above ₹500'
Google creatives sampled: product-led (e.g. 'organic rajmudi rice (rajamudi) — karnataka's heritage red rice')
account: 69 creatives, of which 67 point at organicmandya.com

Two-hour delivery of organic staples is a genuinely scarce promise in this category — it is the kind of thing quick-commerce charges a premium for. Right now the ads sell rice; the promise sells the store. A hook built on 'organic, at your door in two hours' is testable against the current product-led creative in a fortnight, and it uses an asset that is already paid for.

MEDIUM

2. Google is doing almost all the work; Meta is close to unused

google: 69 creatives in the advertiser account
meta: ≈2 active results for the brand term, one of them the brand's own creative (library ID 1432155482101394, since 13 September 2026)
ratio: roughly 35:1

The Meta creative that does exist is well made and points at a category collection rather than a single product, which is the right instinct for a grocery basket. Two ads, though, is a test that was never scaled. Given how visual the product range is, this is the clearest underused channel in the account.

MEDIUM

3. Paid traffic and the dataLayer are speaking two different languages

dataLayer event names observed in the page source: gtm-meta · gtm-promo · gtm-creative · gtm-position · gtm-destination
GA4 property: G-MHKC4DNNH3
Google Ads: AW-16535163896

Custom event names like these are a sign that someone built a careful measurement plan. The value only lands when each event is mapped to a GA4 key event and imported into Google Ads as a conversion. Until that mapping is done, the plan exists in the page and not in the reports.

MEDIUM

4. Three standard paths return 404, including the one corporate buyers look for

GET https://organicmandya.com/pages/faq → 404
GET https://organicmandya.com/pages/bulk-enquiry → 404
GET https://organicmandya.com/pages/corporate-gifting → 404
(3 October 2026)

Bulk and corporate gifting are the two order types most likely to be worth five figures, and both dead-end. For a brand with a farmer story and a co-operative structure, a corporate gifting page writes itself — and it is exactly the kind of order that pays for the paid media that finds it.

NOTE

5. The Google count differs slightly between the account and the domain view

advertiser account (MANDYA ORGANIC FOODS PRIVATE LIMITED): 69 creatives
domain view (organicmandya.com): 67 creatives
difference: 2

A two-creative difference is normally a destination change — ads that used to point at the site and now point elsewhere, or the reverse. It is a small reminder that the platform's own counts answer slightly different questions, and worth knowing before those numbers are quoted in a board deck.

Every row above is a readable public surface. Where a row reads unavailable or not measured, that is exactly what was found — the report does not substitute an estimate.

04 SCORED FROM MEASURED VALUES ONLY

Opportunity score

Measurement integrity		3 / 4
GA4, Ads tag and a purpose-built dataLayer; mapping to key events not confirmed.		
Conversion observability		3 / 4
Shopify with published delivery SLAs; Meta barely tested.		
Brand consistency		4 / 4
Clear farmer-to-family story carried across the site.		
Technical health		3 / 4
Three dead paths; HSTS present; cache policy not set on the storefront.		
Commercial fit		4 / 4
Active Google account plus a scarce delivery promise and untapped Meta inventory.		

OVERALL

17 / 20

5 of 5 dimensions scored

A — strong measurement instincts and a wasted differentiator

QUALIFICATION

Read this before acting on it

Public surfaces only. The 69 and 67 counts come from two different views of the same platform on the same day and are reported as measured, not reconciled. Spend, ROAS and delivery-SLA compliance are not scored — no public source exists for them.

05 ORDERED BY EFFORT AGAINST IMPACT

Suggested next steps

1

LOW EFFORT · IMMEDIATE BENEFIT

Put the two-hour promise into the ad copy

One hook test against the current product-led creative. The claim is already published on your site, so nothing new needs to be true.

2

UNDER AN HOUR

Map the dataLayer events to GA4 key events

gtm-promo, gtm-creative and gtm-destination exist already. Importing them as conversions is configuration, not development.

3

HALF A DAY · BIGGEST SINGLE WIN

Build the corporate-gifting page and scale Meta collection ads

One page for the highest-value order type, plus collection-level Meta ads against the visual catalogue you already have.

NEXT STEP

Happy to walk through any of this on a short call.

7095024220

Nothing here requires new tooling. The first items are configuration, not rebuilds.

ABOUT THIS REPORT

Prepared by Smart Pursuit for Organic Mandya. Every figure was read from a public surface on 3 October 2026 — the Google Ads Transparency Center, the Meta Ad Library, and the brand's own website and published pages.

HOW TO CHECK IT

Each finding quotes the raw measurement above it. Ad counts can be re-checked by domain in the Google Ads Transparency Center (region: India), and tag IDs by opening the site and searching the page source. Spend, ROAS and CPA are private to the advertiser, so they are marked unavailable rather than estimated.
