EXECUTIVE SUMMARY

Why a performance-marketing audit includes the website: Meta does not make you money - the click does. CPL is paid on the ad; the conversion happens on the landing page, the form, WhatsApp speed-to-lead and the proof. If the ad says ZunRoof and the page says 'zunsolar (previously zunroof)' forty times, you spent the click re-introducing yourself instead of selling a roof.

ZunRoof Tech Pvt Ltd, founded 2016 in Gurugram by **Pranesh Chaudhary** (IIT-KGP) and Sushant Sachan. Backed by the **Godrej family office (ANBG Enterprise LLP)**, which holds 70%+; **\$18M raised across 11 rounds**, latest **Rs.25.14 Cr on 12 Sep 2025** (47,986 shares at Rs.5,239), after Rs.20 Cr in Dec 2024. Revenue band **Rs.10-50 Cr** (Tracxn, FY25). Day-1 file 14 Sep 2026: **7/10 HOT**, ~23 ads, Lead Form dest, Rs.20 L+/mo est., pitch_fit HIGH.

Live check 14 Sep 2026: zunroof.com now resolves to zunsolar.com - the brand renamed, but the old name is still what the market, the ads and the Day-1 file carry. The homepage claims **Rs.60,00,00,000 saved in electricity bills, 40,000+ happy customers, 75+ cities, India's no.1 Solar EPC, 4x YoY growth, Tier-1 panels with 25-year performance warranty, 20% booking payment, 0% EMI, a 25-day installation promise and commissioning within 50 days of layout approval**. Empanelment badges: **MNRE, HAREDA, PSPCL, TSREDCO**. WhatsApp is live at **+91 9205695690** with a pre-filled message that still says 'via zunroof.com'. **Two compliance-grade copy problems:** the subsidy block says '*Avail upto 40% solar subsidy on total installation cost as per Government guidelines*' - PM Surya Ghar pays fixed slabs (Rs.30,000 / Rs.60,000 / Rs.78,000), not a percentage - and the ROI block promises a '*quick payback period of 3-4 years guaranteed*'. The proof layer is **text-only testimonials**, an embedded YouTube video that returns 'Video unavailable', and a press wall dated **2019-2021** ('160% growth in FY 2021').

Day-1 leak, confirmed: static poster creatives, stock images, no roof before/after - against 40,000 real installs. *Ad counts are Day-1 estimates. Never promise subsidy approval.*

1. AD INTELLIGENCE

Why website = performance

Ad Library is 30% of the leak. The other 70%: (1) does the landing match the hook, (2) can they WhatsApp in under 5 minutes, (3) is there proof a neighbour installed, (4) is the form short, (5) does tracking fire on WhatsApp/enquire not just PageView. zunsolar passes (2) and half of (5); it fails (1) on brand continuity, (3) on visual proof, and (4) has no short-form calculator path. That is why we audit the site, not just the ~23 creatives.

Active platforms

Meta (FB+IG) primary for residential; Google Search/PMax on 'solar panel price', 'rooftop solar subsidy', 'solar installer'. Owned: zunsolar.com + the zunsolar monitoring app. Sister brand zunpulse (smart home) shares press and brand equity. Check BOTH zunroof.com and zunsolar.com in Google Ads Transparency - a rebrand splits the transparency record.

Active ads (est.)

~23 creatives by Day-1 signature; Rs.20 L+/mo est. Verify in Meta Ad Library India (active filter) searching **both** 'ZunRoof' and 'zunsolar' - post-rebrand the page name may differ from the Day-1 record. Do not quote 23 as a hard number.

Offer / proof assets (14 Sep 2026)

Rs.60 Cr customer bill savings, 40,000+ customers, 75+ cities, 4x YoY growth since 2016, Tier-1 panels + 25-yr performance warranty, lifetime service promise, IoT remote monitoring app, 3D shadow-profiling site design, 20% booking payment with milestone billing, solar loans + 0% EMI, 25-day install promise, 50-day commissioning commitment, MNRE/HAREDA/PSPCL/TSREDCO empanelment. Almost none of this is in the creative.

Funnel / CRO (14 Sep 2026)

Ad -> zunsolar.com -> 'Go Solar' enquiry + floating WhatsApp (+91 9205695690, pre-filled 'via zunroof.com'). No published price or per-kW band, no savings/payback calculator, no city landing pages despite 75+ cities, no site-survey scheduler. Testimonials are text with names, kW and city (Gurugram, Lucknow, Ghaziabad, Delhi, Mohali, Amritsar, Meerut) - excellent raw material, zero photos or video.

Compliance risk to fix before scaling spend	'Avail upto 40% solar subsidy on total installation cost' is not how PM Surya Ghar works in 2026 - it is Rs.30,000 / Rs.60,000 / Rs.78,000 for 1/2/3+ kW, paid by DBT, with loans at 5.75%. 'Payback 3-4 years guaranteed' is an outcome guarantee. Both invite disputes and Meta ad rejections. Restate as exact slabs plus 'MNRE process; zunsolar does not approve subsidy'.
--	---

2-5. CREATIVE / COPY / CRO / TRACKING SCORES

Subsidy & Scheme Clarity		3/10
WhatsApp / Speed-to-Lead		7/10
Social Proof (Installs)		4/10
Creative Variety (Video/Reels)		2/10
Landing Page & Form CRO		4/10
Tracking & Retargeting		4/10

- **You are paying a rebrand tax on every click (confirmed 14 Sep 2026).** zunroof.com now resolves to zunsolar.com, and the new site says 'zunsolar (previously zunroof)' in nearly every paragraph, testimonial and press headline - even the WhatsApp deep link still ends 'via zunroof.com'. Search demand, the Day-1 record and probably the ad account still say ZunRoof. Decide the ad-facing name, run one clean 301 map, update the WhatsApp prefill and the Google Ads Transparency domain, and stop spending media money explaining a name change mid-funnel.
- **The subsidy line is wrong for 2026 and is a compliance risk.** The page offers 'upto 40% solar subsidy on total installation cost as per Government guidelines'. PM Surya Ghar pays fixed central assistance - Rs.30,000 (1 kW), Rs.60,000 (2 kW), Rs.78,000 (3 kW and above) - by DBT, with scheme loans at 5.75%. A percentage promise over-states small systems, under-states nothing, and creates cancelled orders at DISCOM stage. Replace it with the exact slab table plus 'MNRE process; zunsolar does not approve subsidy'. Same treatment for 'payback period of 3-4 years guaranteed' - model it, do not guarantee it.
- **Day-1 leak confirmed: stock posters sitting on top of 40,000 real installs.** The creative is static posters and stock imagery with no roof before/after - while the site itself lists named customers with capacity and city: 17 kW Gurugram, 11 kW Delhi, 9 kW Zirakpur, 7 kW Lucknow, 6 kW Amritsar, 5 kW Meerut, 3 kW Mohali. That is a ready-made shoot list. The one embedded YouTube video on the homepage returns 'Video unavailable'. In a category where PM Surya Ghar is adding ~16,328 installs a day, the brand with 40,000 roofs should own the UGC feed, not the stock library.
- **No price, no calculator - the highest-intent question is unanswered.** There is no per-kW band, no system pricing and no savings/payback tool anywhere on zunsolar.com. '20% booking payment' and '0% EMI' are strong commercial hooks buried in body copy. A 3-field calculator (city, monthly bill, roof type) that captures the phone number *before* showing the number typically lifts form completion 1.5-2x and gives the ad account a mid-funnel conversion event to optimise on.
- **75+ cities, zero city pages.** Testimonials span Gurugram, Lucknow, Ghaziabad, Faridabad, Greater Noida, Delhi, Meerut, Mohali, Dera Bassi, Zirakpur, Amritsar - and empanelment covers HAREDA (Haryana), PSPCL (Punjab), TSREDCO (Telangana). None of it is expressed as a city landing page or a localised ad set, so the Haryana/Punjab DISCOM advantage never shows up in the auction. Build 8-10 city pages with local installs, local DISCOM process and the local net-metering timeline.
- **The proof wall stopped updating in 2021.** Press links are Financial Express, Tol, The Hindu, ET, CNBC-TV18 and Business World - all 2019-2021, headlined '160% growth in FY 2021'. Meanwhile the actual news is current and far stronger: Godrej family office holds 70%+, Rs.25.14 Cr raised on 12 Sep 2025, \$18M total across 11 rounds. Godrej-backed is a trust asset in a category where homeowners fear the installer disappearing before the net meter arrives - put it in the creative and above the fold.

6. COMPETITOR BENCHMARK

Competitor	What they do better	Signal for zunsolar / ZunRoof
SolarSquare	City landing pages, 15k+ Google ratings, savings calculator, subsidy rupees on the first screen, heavy install UGC.	You have 40,000 installs across 75+ cities and publish neither a calculator nor a city page. This is a pure execution gap, not a budget gap.
Freyr Energy / Oorjan	Freyr's hero is 'Save Rs.1 Lakh'; Oorjan leads with financing. Both make the money math the headline.	Your money story - 20% booking, 0% EMI, Rs.60 Cr saved, 3-4 year payback - is in paragraph four. Move it to the ad.
Tata Power Solar / Waaree	Balance-sheet trust, exact CFA slabs per SKU, DCR/ALMM clarity, DISCOM familiarity.	Godrej family office at 70%+ is your answer to the trust objection - and you never say it. State the slabs correctly and the trust gap closes.
Local HAREDA/PSPCL empanelled installers	Same-day WhatsApp quote, neighbourhood install photos, 48-hour survey.	You already have WhatsApp 9205695690 and a 25-day install promise. Add speed-to-lead SLA and terrace proof and you beat them on both trust and speed.

7. 3 QUICK WINS (Implement in 7 Days)

WIN 1 - 48 hours: finish the rebrand, fix the subsidy line, put the money on the first screen

One name in the ad account, one 301 map zunroof.com -> zunsolar.com, WhatsApp prefill updated (drop 'via zunroof.com'), transparency domain updated. Replace 'upto 40% subsidy' with the exact PM Surya Ghar slabs (Rs.30,000 / Rs.60,000 / Rs.78,000, DBT, 5.75% scheme loan) plus 'MNRE process; zunsolar does not approve subsidy'. Soften 'payback guaranteed' to a modelled 3-5 years. Hero becomes: 40,000+ roofs, Godrej-backed, 20% to book, 0% EMI, installed in 25 days. Expected: ad-rejection and dispute risk gone, and 25-40% more qualified WhatsApp chats at the same spend.

WIN 2 - 7 days: 3-field savings calculator + 8 city pages + a mid-funnel conversion event

Ship the calculator (city, monthly bill, roof type) with phone capture before the result, and fire a distinct pixel event on calculator-complete and WhatsApp-click so Meta can optimise on something better than PageView. Build city pages for Gurugram, Delhi, Faridabad, Noida, Lucknow, Mohali, Amritsar and Hyderabad using the testimonials you already have, plus local DISCOM/HAREDA/PSPCL/TSREDCO process and timelines. Expected: 1.5-2x form completion and meaningfully cheaper CPL on local intent keywords.

WIN 3 - 14 days: 25 terrace Reels, a working video wall, and 60-day retargeting

Shoot 25 installs from the existing customer list - 17 kW Gurugram, 11 kW Delhi, 9 kW Zirakpur, 7 kW Lucknow, 6 kW Amritsar - before/after roof, net meter running backwards, customer reading old vs new bill, in Hindi/Punjabi/Hinglish. Fix the broken homepage YouTube embed. Refresh the press wall from 2021 to the Godrej 70%+ / Rs.25.14 Cr Sep-2025 story. Audiences: calculator abandoners, WhatsApp non-repliers, 50% video viewers - 60-day windows, because rooftop is a 30-90 day decision. Expected: Day-1 leak closed, higher survey-to-order rate.

EXPECTED IMPACT

Metric	Current (14 Sep 2026)	After Wins	Impact
Brand continuity in funnel	Ad says ZunRoof, page says 'previously zunroof'	One name, clean 301s	No rebrand tax on clicks
Subsidy claim	'upto 40%' (incorrect, risky)	Exact Rs.30k/60k/78k slabs	Compliance cancellations + fewer
Price / payback tool	None published	3-field calculator with capture	1.5-2x form completion
City coverage	75+ cities, 0 city pages	8 city landing pages	Cheaper local CPL
Install UGC in ads	Stock posters, broken video embed	25 terrace Reels, 3 languages	Day-1 leak closed
Cost per residential lead	Rs.250-450	Rs.150-250	~40% cheaper

READY TO PLUG THESE LEAKS?

Smart Pursuit will run a **14-day solar sprint** for zunsolar: finish the zunroof-to-zunsolar migration so paid clicks stop paying a rebrand tax, replace the illegal-sounding '40% subsidy' and 'payback guaranteed' copy with exact PM Surya Ghar rupees, ship a 3-field savings calculator, and turn 40,000 installs into 25 terrace Reels. Priced against **CPL and cost per site survey / installed kW**, not impressions.
