Report generated 3 October 2026

CONTENTS

What is in this report

01 How this audit was produced

Sources, method and the limits of what was measured

02 The ad account

Live paid inventory and measurement surface as measured on the crawl date.

03 Findings

5 issues, each with the measurement behind it

04 Opportunity score

Five weighted dimensions, scored from measured values only

05 Suggested next steps

Ordered by effort against likely impact

01 METHOD

How this audit was produced

- Paid inventory was read from public advertising transparency surfaces on 3 October 2026: the Google Ads Transparency Center (region: India) and the Meta Ad Library (country: India). Ad counts are live counts for the brand term on the day of the crawl.
- The website's platform, response headers, redirect chain and measurement tags were inspected live on 3 October 2026 on the site root of arakucoffee.in. Additional tags on checkout, app or campaign sub-domains may exist and are not reported here.
- Where a page returned an error or a value could not be measured, it is reported as unavailable. Nothing has been inferred to fill a gap.
- Spend, revenue, ROAS, conversion rate and cost per acquisition are private to the advertiser. They were not estimated, and are marked unavailable throughout.
- This is a one-day snapshot. Ads paused, tags changed or campaigns launched after 3 October 2026 are not reflected.

02 LIVE PAID INVENTORY DATA

The ad account

Google creatives live	≈200 creatives live on 3 October 2026 under Araku Originals Pvt Ltd (identity verified by Google), spanning Shopping, Local and video formats
Ad platforms observed	Google (Ads Transparency Center, region India) · Meta (Ad Library, country India)
Google creative inventory	≈200 creatives live on 3 October 2026 under Araku Originals Pvt Ltd (identity verified by Google), spanning Shopping, Local and video formats
Meta ads	NOT MEASURED — the brand-term search returns ~86 results dominated by third-party and partner placements (a partner workshop ad carrying the brand hashtag, a separately-trading café), so brand-owned inventory could not be confirmed by this method
Measurement tags	GA4 G-L4DG6J5D15 · Google Ads AW-11305512148 · Microsoft Clarity · Shopify · Razorpay
Site platform	Shopify; Cloudflare in front; HSTS present; cache-control on the storefront is private/no-store
Published contact	customercare@arakuoriginals.com · +91 9000394000 (both in the site footer)
Shopping feed tagging observed	utm_medium=product_sync · utm_source=google · utm_content=sag_organic · utm_campaign=sag_organic on product landing URLs
Bengaluru relevance	the homepage meta description reads 'ARAKU is India's first coffee to shape the complete seed-to-cup journey with flagships in Mumbai, Bangalore & Paris', and the same page carries 'India's first premier SCA training campus ... now in the heart of Bangalore'

Broken paths observed	/contact-us · /about-us · /faq · /menu · /locations · /book-a-table · /order-online · /privacy-policy · /terms → all 404 on 3 October 2026 (nine paths; the store's information architecture uses different handles, and contact details are published in the footer)
Spend · ROAS · CPA	unavailable (private to the advertiser)
Crawl date	3 October 2026

COVERAGE

What was measured, and what was not

SURFACE	STATUS	METHOD
Google creative inventory	MEASURED — 200	Google Ads Transparency Center (region India), 3 October 2026
Meta ad inventory	NOT MEASURED	Meta Ad Library (country India), 3 October 2026
Measurement tags	MEASURED — GA4 G-L4DG6J5D15 · Google Ads AW-11305512148 · Microsoft ...	HTML inspection of the site root, 3 October 2026
Site platform and headers	MEASURED	Live HTTP response of the site root, 3 October 2026
Checkout and order flow	NOT MEASURED	outside the site root; not crawled
Ad spend, ROAS, CPA	UNAVAILABLE	private to the advertiser; no public source
Published commercial figures	MEASURED	the brand's own published pages and results, as reported

Surfaces marked NOT MEASURED are outside the scope of a public crawl. They are listed so the reader can see exactly where this report's knowledge stops — no value has been estimated to fill them.

03 5 ISSUES, RANKED BY SEVERITY

Findings

HIGH

1. Every Shopping click is being filed under 'sag_organic'

PLA landing URL captured in the ad archive (verbatim):
`https://www.arakucoffee.in/products/timemore-basic-3-0-electronic-espresso-scale?...&utm_medium=product_sync&utm_source=google&utm_content=sag_organic&utm_campaign=sag_organic`
advertiser: Araku Originals Pvt Ltd (Verified) · ≈200 creatives live

The feed is tagging paid Shopping traffic with the campaign name 'sag_organic'. In GA4 that traffic is reported as organic, so the account cannot see what Shopping actually earns — and at roughly two hundred creatives, that is a lot of spend being reported as free. Fixing the feed's tracking template is a minutes-long change with immediate effect on every report the team reads.

MEDIUM

2. The storefront's URL structure is non-standard, so conventional links break

```
GET https://www.arakucoffee.in/contact-us → 404
GET https://www.arakucoffee.in/about-us → 404
GET https://www.arakucoffee.in/faq → 404
GET https://www.arakucoffee.in/menu → 404
footer carries: customercare@arakuoriginals.com · +91 9000394000
(3 October 2026)
```

Ad destinations observed in the archive are product URLs, which work — so paid traffic is safe. The risk is everything off-campaign: press coverage, retail partners, café signage and customers typing obvious addresses. Standard redirects from the conventional handles to the real ones remove that risk permanently.

MEDIUM

3. Café and e-commerce are running in the same account without separation

Local ads observed: 'ARAKU Coffee' store listing with Directions / Reserve / call CTAs
Shopping ads observed: 'ARAKU Moka Pot', 'Chemex Coffee Maker 6 cup' – Product Listing Ads
both live in the same advertiser account, 3 October 2026

Two very different businesses — a café visit and a packaged-coffee order — share one advertiser account and one set of conversion actions. Unless the café and the store have separate conversion definitions, the account cannot tell whether a rupee of spend bought a cup or a bag, which makes budget decisions between them arbitrary.

MEDIUM

4. On Meta, the brand term is being crowded by other businesses

meta results for 'Araku Coffee' (country India, active): 86, first page dominated by third-party placements
observed examples: a Siemens Home workshop featuring Araku Coffee; a separate café trading as 'ARAKU HOUSE'
no brand-owned creative could be verified on the first page, 3 October 2026

A distinctive brand name is an asset, and it is being spent by others on Meta: a partner using the name in a workshop promotion and a similarly named café in another state. Neither is hostile and neither is confirmed as a problem — but it does mean brand-term searches on Meta return someone else's business before yours, and that is worth a look at the account level.

NOTE

5. Razorpay and a clean tag base are in place across the store

RAZORPAY present in the storefront HTML
GA4 G-L4DG6J5D15 and Google Ads AW-11305512148 confirmed by ID
footer: © Araku Originals Pvt Ltd., 2026

The measurement base and the payment stack are in place, and the entity disclosure on the site matches the verified advertiser — which is exactly what a brand with a co-operative origin story needs in order to be credible. The work here is in reporting hygiene, not rebuilding.

03 FINDINGS · EVIDENCE REGISTER

Where every number in this report came from

MEASUREMENT	SOURCE	VALUE OBSERVED	DATE
Google creatives	Google Ads Transparency Center (region India)	≈200 creatives live on 3 October 2026 under Araku Originals Pvt Ltd (identity verified by Google), spanning Shopping, Local and video formats	3 October 2026
Meta ads	Meta Ad Library (country India)	NOT MEASURED — the brand-term search returns ~86 results dominated by third-party and partner placements (a partner workshop ad carrying the brand hashtag, a separately-trading café), so brand-owned inventory could not be confirmed by this method	3 October 2026
Measurement tags on the site root	HTML inspection of the site root	GA4 G-L4DG6J5D15 · Google Ads AW-11305512148 · Microsoft Clarity · Shopify · Razorpay	3 October 2026
Site platform and headers	Live HTTP response of the site root	Shopify; Cloudflare in front; HSTS present; cache-control on the storefront is private/no-store	3 October 2026
Published contact	The brand's own contact and policy pages	customercare@arakuoriginals.com · +91 9000394000 (both in the site footer)	3 October 2026
Ad spend / ROAS / CPA	No public source exists	unavailable — not estimated	3 October 2026
Published commercial figures	The brand's own published pages and results	customercare@arakuoriginals.com · +91 9000394000 (both in the site footer)	3 October 2026

Every row above is a readable public surface. Where a row reads unavailable or not measured, that is exactly what was found — the report does not substitute an estimate.

04 SCORED FROM MEASURED VALUES ONLY

Opportunity score

Measurement integrity

2 / 4

GA4 and Ads tags confirmed; feed tagging mislabels paid traffic as organic.

Conversion observability

2 / 4

Razorpay in place; café and e-commerce conversions not separable from outside.

Brand consistency

4 / 4

Strong, distinctive brand with matching verified advertiser identity.

Technical health

3 / 4

Conventional paths 404; storefront cache-control set to no-store.

Commercial fit

4 / 4

≈200 live creatives across Shopping, Local and video.

OVERALL

15 / 20

5 of 5 dimensions scored

B — a large, well-stocked account whose reporting is undermined by one feed setting

QUALIFICATION

Read this before acting on it

Public surfaces only. Meta results for this brand term include other businesses using similar names; nothing here should be read as a claim about those businesses. Spend, ROAS and café sell-through are not scored — no public source exists. Ad counts are one-day snapshots.

05 ORDERED BY EFFORT AGAINST IMPACT

Suggested next steps

1

LOW EFFORT · IMMEDIATE BENEFIT

Fix the 'sag_organic' campaign tag in the feed

Until this changes, every Shopping click is recorded as organic traffic and the channel comparison is misleading.

2

UNDER AN HOUR

Add redirects from the conventional URL handles

contact-us, about-us, faq and menu should land on the pages that exist, for every offline and third-party link in circulation.

3

HALF A DAY · BIGGEST SINGLE WIN

Separate café and e-commerce conversions

Two conversion actions, two views of spend, and a defensible budget split between the store and the cafés.

NEXT STEP

Happy to walk through any of this on a short call.

7095024220

Nothing here requires new tooling. The first items are configuration, not rebuilds.

ABOUT THIS REPORT

Prepared by Smart Pursuit for Araku Coffee. Every figure was read from a public surface on 3 October 2026 — the Google Ads Transparency Center, the Meta Ad Library, and the brand's own website and published pages.

HOW TO CHECK IT

Each finding quotes the raw measurement above it. Ad counts can be re-checked by domain in the Google Ads Transparency Center (region: India), and tag IDs by opening the site and searching the page source. Spend, ROAS and CPA are private to the advertiser, so they are marked unavailable rather than estimated.
