3 LEAKS WE FOUND (live-verified)

LEAK 1: Meta clicks land on a store-locator The live Bengaluru Meta ad deep-links to licious.in/store-locator. Buyers who tapped for 'never frozen' hit a city picker - one full step before any product or price.
LEAK 2: 300+ creatives = spend spread thin With this many assets and a large Local store-ad layer, budget thins across geos and creatives. The top-performing SKU/geo clusters are not being concentrated on.
LEAK 3: Cold-chain proof stops at the ad 'Never frozen' and '0-4C from source' are the strongest claims you own - but the landing page does not carry them, so the trust built in the ad is dropped on click.

3 QUICK WINS (14-DAY ROADMAP) → FIX LEAKS + LOWER CPA

DAY 1-3: Deep-link the top 5 Bengaluru ads to product pages Repoint the highest-spend Meta ads from the locator to the SKU page with <code>city_id=1</code> pre-set. No new creative, no new budget - removes the costliest step between tap and cart.
DAY 4-7: Concentrate Google spend + start the creative system Cut the bottom-third creatives, concentrate budget on the SKU/geo clusters that carry the cold-chain promise, and stand up a weekly 3-format shoot (proof Reel, source story, offer card).
DAY 8-14: Fix the signal: CAPI + Enhanced Conversions Audit server-side events end to end, dedupe browser/server, and pass order value so Smart Bidding optimises on full signal - the same spend buys more carts.
