EXECUTIVE SUMMARY

Milky Mist Dairy Food Limited is a Tamil Nadu dairy major preparing for the public markets - the site carries a full IPO section, CSR, corporate governance, financial information, stock-exchange intimations and the SEBI Regulation 46 disclosures. Yet Google Ads Transparency shows only 3 live creatives. For a company that will be judged on demand durability and brand strength, that is a striking gap: category searches for paneer, curd, cheese and ghee are being answered by Amul, Nandini and quick-commerce private labels. There is also a strong Bengaluru story to lean on - the brand runs its office out of HSR Layout, a short walk from some of India's most competitive quick-commerce operations.

1. AD INTELLIGENCE

Google Ads (verified)	3 live creatives; advertiser Milky Mist Dairy Food Limited.
Corporate status	IPO section live on the corporate site, with CSR, corporate governance, financial information, stock-exchange intimations, analyst/investor conferences and SEBI Regulation 46 disclosures - i.e. a pre-listing company.
Footprint	Registered office at Pattakkaranpalayam, Perundurai, Erode 638057, Tamil Nadu (CIN U15200TZ2014PLC020554); Bangalore office at HSR Layout, Bengaluru 560102; mega plant at Perundurai.
Product breadth	Paneer, curd, fruit yogurt, premium yogurt, ice cream, condensed milk, ghee, cheese, butter, ready-to-drink, desserts, UHT and food enhancers - plus sub-brands Capella, Asal, Smartchef and Briyas.
Digital estate	Corporate site on Wix (www.milkymist.com) plus a separate Shopify online store (shop.milkymist.com) - two properties, two journeys, one brand.
Published contacts	customer@milkymist.com for feedback/complaints; investor@milkymist.com (Company Secretary & Compliance Officer, Mr. S Prakash); toll-free 1800-419-9000, 9am-6pm Monday to Saturday.

- **A pre-IPO dairy brand with 3 live ads is leaving its own category to competitors:** paneer, curd, ghee, cheese and ice cream are all searched with high commercial intent. Every one of those searches is a chance for Amul or a quick-commerce private label to be chosen instead of Milky Mist.

- **Brand search defence:** with a listing on the horizon, brand-name searches should be protected and measured - if a competitor or a marketplace outbids your own name, you pay for it in both margin and mindshare.

- **Two properties, two journeys:** a Wix corporate site plus a separate Shopify store means the paid click, the brand story and the purchase path live in different places. Consolidating the journey (or at least the handoff) is a direct conversion win.

- **Quick-commerce is both a channel and a threat:** buyers now search 'paneer home delivery' inside apps. Unless Milky Mist owns the generic search layer on Google and reinforces brand recall, the aggregator owns the customer relationship - and the repeat purchase.

- **No subscription mechanics visible:** dairy is the most subscription-friendly food category in India (milk, curd, paneer weekly). A subscribe-and-save flow on the Shopify store would add predictable, higher-LTV revenue before the IPO window.

6. COMPETITOR BENCHMARK

Amul / Nandini / Heritage	Massive distribution + price trust + strong brand recall.	Compete on quality proof (paneer texture, milk fat standards) and product-specific search.
Quick-commerce private labels	Own the in-app search and 10-minute delivery.	Own Google-level generic search and drive to a strong subscription offer.
Premium dairy D2C brands	Subscription and packaging-led brands.	Milky Mist's plant scale + product range is a moat - say it in the ads.

7. 3 QUICK WINS (Implement in 7 Days)

WIN 1 - Category search moat

Launch full-funnel Google search across brand, category and competitor terms ('paneer online', 'curd home delivery', 'ghee', 'fresh cheese') with product-specific landing pages on the Shopify store and clean tracking per SKU family.

WIN 2 - Subscribe-and-save

Add a monthly dairy subscription (milk, curd, paneer bundles) with free delivery thresholds and WhatsApp reminders - the highest-LTV mechanic in Indian dairy, and a strong pre-IPO demand story.

WIN 3 - Unify the digital journey

Decide the primary purchase destination (Shopify store) and route all paid traffic there; use the Wix corporate site for brand, investor and B2B audiences. Then measure per-SKU-family to know what the spend is buying.

EXPECTED IMPACT

Metric	Current (live)	After Wins (est.)	Impact
Google presence	3 live creatives	Brand + category + competitor search	Category demand captured
Recurring revenue	No visible subscription	Dairy subscribe-and-save	Predictable, higher-LTV revenue pre-IPO
Journey clarity	Two properties, split funnel	One purchase destination, measured	Higher conversion per rupee
Brand defence	Partially unmanaged	Brand terms owned + measured	Lower CPC, protected mindshare
