EXECUTIVE SUMMARY

Why a performance-marketing audit includes the website: Meta does not make you money - the click does. CPL is paid on the ad; the conversion happens on the landing page, the form, WhatsApp speed-to-lead and the proof. MYSUN's problem is not the funnel design - it is that the brand is spread across **three domains, one of which is dead**, and the page that ranks for the biggest hook in the category publishes a **factually wrong subsidy figure**.

MYSUN, legal entity **Eastern Light & Power Pvt. Ltd.** (incorporated 23 Sep 2015), founded by **Gagan Vermani (Founder & CEO, ex-MD/CEO SunBorne Energy)** with Gyan Prakash Tiwari and Divyanshu Sachdev. Base **Noida / Delhi NCR** - the Day-1 file says New Delhi. Funding: **\$2.5M angel (Oct 2016, Hemant Taneja of General Catalyst joined the board), Rs.32 Cr / ~\$4.2M pre-Series A (Apr 2020), Rs.15 Cr debt from Tata Cleantech Capital (Jul 2021, part of a \$100M Green Climate Fund facility) - \$9.37M total across 4 rounds**; last raise was **five years ago**. Asset vehicle **MYSUN+** was launched with a stated Rs.600 Cr first phase and a 200 MW pipeline. Present in **9 states**. MCA: subsidiary **ELP Solar One Pvt Ltd** shows **under Rs.10 Cr revenue FY25, 29 employees, 1-year profit CAGR -13%**, and **eight sibling ELP Solar entities are struck off**. Day-1 file 14 Sep 2026: **4/10**, ~3 ads, WhatsApp dest, pitch_fit HIGH.

Live check 14 Sep 2026: mysun.co returns HTTP 500 - the Day-1 file's primary domain is dead. The live site is **itsmysun.com**, and the subsidy page links out to a *third* domain, **mysunn.in**, for state-level subsidy content. What works is genuinely strong: a **free Solar Savings Report calculator** segmented residential vs industrial, **Zero Cost EMIs / loans up to 60 months**, **MYSUN Deferred Payment (25-30% upfront)**, **MYSUN Assured 25-year care**, **Flexi-pay booking at Rs.6,999**, an AMC renewal product, a premium **ARBOR / CANOPAS solar-pergola** range, a dedicated **PM Surya Ghar page with a Hindi version**, photo testimonials with named customers, and **two WhatsApp lines (9873167009 and a Wati chat widget on 9311988980)**.

What is broken: the PM Surya Ghar page states *'The government subsidy covers up to 40% of the installation costs'* - the scheme pays fixed slabs, not a percentage - and its own subsidy table contradicts itself, listing **'2kW - Rs 30,000 per kW - 60,000'** alongside **'3kW - Rs 18,000 for 2-3kW - 78,000'**, which does not add up as printed. Case studies are dated **2018**; the press wall's newest item is **Jul 2021**; testimonial photos are from 2018 and 2023. *Ad counts are Day-1 estimates. Never promise subsidy approval.*

1. AD INTELLIGENCE

Why website = performance	Ad Library is 30% of the leak. The other 70%: (1) does the landing match the hook, (2) can they WhatsApp in under 5 minutes, (3) is there proof a neighbour installed, (4) is the form short, (5) does tracking fire on calculator/WhatsApp not just PageView. MYSUN passes (2) and (3) better than most of this cohort - two WhatsApp lines and photo testimonials. It fails (1) catastrophically if any legacy creative or backlink still points at mysun.co, which is returning HTTP 500.
Active platforms	Meta (FB /MySunIndia, IG @mysunindia), Google Search on 'solar calculator', 'PM Surya Ghar subsidy', 'rooftop solar Noida/Delhi'. The PM Surya Ghar page with a Hindi variant is clearly built for organic and paid search capture. WhatsApp via Wati. Check Google Ads Transparency on itsmysun.com - the Day-1 record lists mysun.co, which is dead, so that transparency record will look empty.
Active ads (est.)	~3 creatives by Day-1 signature - the lowest count in the entire Day-1 cohort - against a Day-1 spend estimate of Rs.20 L+/mo. Those two numbers are inconsistent; the spend figure looks stale. Given ELP Solar One reports under Rs.10 Cr revenue and 29 staff for FY25, treat Rs.20 L+/mo as unverified and re-estimate from live Ad Library before pitching.
Offer / products (14 Sep 2026)	Residential and housing-society rooftop, C&I; up to 1.75 MWp (Bhilwara textile plant), 397 kWp Chittor Polyfab, 231 kWp Update Prints Gurgaon, 35 kWp St. Xavier's Mumbai, 9.4 kWp Nirvana Country Gurgaon. Premium pergola range ARBOR and CANOPAS plus a CYRA line. Financing: Zero Cost EMI, loans to 60 months, Deferred Payment at 25-30% upfront, Flexi-pay booking Rs.6,999. Service: MYSUN Assured 25-year promise, paid AMC packages.

Funnel / CRO (14 Sep 2026)	Ad -> itsmysun.com -> Solar Calculator (free Savings Report, residential ?type=R / industrial ?type=I) or the PM Surya Ghar landing page -> lead form (consumer category, product interest, reCAPTCHA) -> WhatsApp advisors. Floating WhatsApp on 9873167009 plus a Wati widget on 9311988980 - two different numbers is a routing and attribution problem. Calculator shows a 'may take a couple of minutes' loader, which is a real drop-off risk on mobile.
Corporate signal worth knowing before you pitch	Last funding was Jul 2021 (Rs.15 Cr debt, Tata Cleantech). MCA shows ELP Solar One at under Rs.10 Cr FY25 revenue, 29 employees, profit CAGR -13% over 1 year, with eight related ELP Solar SPVs struck off and SunBorne legacy entities struck off. Pitch efficiency and CPL, not brand-building retainers: this is a company that needs cheaper leads, not a bigger budget.

2-5. CREATIVE / COPY / CRO / TRACKING SCORES

Subsidy & Scheme Clarity		4/10
WhatsApp / Speed-to-Lead		7/10
Social Proof (Installs)		5/10
Creative Variety (Video/Reels)		2/10
Landing Page & Form CRO		3/10
Tracking & Retargeting		3/10

- **Your Day-1 primary domain is dead and the brand is split across three (verified 14 Sep 2026).** mysun.co returns HTTP 500. The live site is **itsmysun.com**. The PM Surya Ghar page then links to a third domain, **mysunn.in**, for state subsidy content. Any legacy creative, backlink, business listing or QR code pointing at mysun.co is burning spend into a 500 error, and your Google Ads Transparency record is filed under a domain that no longer resolves. Pick one domain, 301 the others, and re-point every ad, listing and profile.

- **Your PM Surya Ghar page publishes an incorrect subsidy claim.** The page states '*The government subsidy covers up to 40% of the installation costs*'. PM Surya Ghar does not pay a percentage of cost - it pays fixed central assistance of Rs.30,000 / Rs.60,000 / Rs.78,000 for 1 / 2 / 3+ kW, by DBT, with scheme loans at 5.75%. This is the page you are trying to rank and convert on, and the headline number on it is wrong. It creates cancelled orders at DISCOM stage and, on paid traffic, it is a dispute waiting to happen.

- **The subsidy table contradicts itself in print.** It lists '1kW - Rs 30,000 per kW - 30,000', then '2kW - Rs 30,000 per kW - 60,000', then '3kW - Rs 18,000 for 2-3kW - 78,000'. As printed, 2 kW at Rs 30,000 per kW plus Rs 18,000 does not produce 78,000 by the stated logic, and a reader cannot reconstruct the rule. State it plainly: Rs.30,000 for the first kW, Rs.30,000 for the second, Rs.18,000 for the third, capped at Rs.78,000 for 3 kW and above - plus the GHS/RWA rate of Rs.18,000 per kW. Add 'MNRE process; MYSUN does not approve subsidy'.

- **Day-1 leak confirmed: real proof, none of it in the creative, and all of it ageing.** You have what most competitors do not - named photo testimonials (Sushil Sharma Greater Noida, Dr. Vishal Chhabra and Vikas Gera New Delhi), and marquee installs: 1.75 MWp Bhilwara, 397 kWp Chittor Polyfab, 231 kWp Update Prints, 35 kWp St. Xavier's Mumbai. But the case-study dates on site read **2018**, the press wall's most recent logo is **Jul 2021**, and none of it appears in the ~3 live creatives. A 2018 case study on a 2026 landing page reads as 'this company stopped growing'.

- **Your calculator is the best asset in this Day-1 cohort and almost nothing is being sent to it.** A free Savings Report segmented residential vs industrial, plus Zero Cost EMI, 60-month loans, 25-30% deferred payment and a Rs.6,999 Flexi-pay booking, is a stronger conversion stack than SolarSquare or Freyr publish. With only ~3 live creatives it is starved. Fire distinct pixel events on calculator-start, report-generated, WhatsApp-click and Flexi-pay-booking, then scale against report-generated. Also fix the 'might take a couple of minutes' loader - on mobile 4G that is where the report request dies.

- **Two WhatsApp numbers, one attribution mess.** The floating button uses 9873167009; the Wati chat widget uses 9311988980; the subsidy page's confirmation screen quotes 9873167009. Three touchpoints, two numbers, no single tracked entry point. Consolidate to one WhatsApp Business number with click-to-WhatsApp ad routing and a per-source ref parameter, so you can finally attribute cost per conversation - which, at this spend level, is the only metric that matters.

6. COMPETITOR BENCHMARK

Competitor	What they do better	Signal for MYSUN
SolarSquare	One domain, city pages, 15k+ Google ratings, current install UGC, subsidy rupees stated correctly.	Your calculator and financing stack are better. They simply have one working domain and fresher proof.
zunsolar (ZunRoof)	Godrej-backed trust, 40,000 roofs, 25-day install promise, single WhatsApp line.	You have Tata Cleantech and General Catalyst on the cap table and never say it. Same trust play, unused.
Freyr Energy / Oorjan	Freyr leads with 'Save Rs.1 Lakh'; Oorjan pushes bank financing hard.	You have Zero Cost EMI, 60-month loans and Rs.6,999 booking - the strongest money offer in this cohort, buried below the fold.
Local Delhi NCR installers	Same-day WhatsApp quotes, neighbourhood photos, fast surveys.	Your two WhatsApp numbers and 2018 case studies hand them the speed and freshness advantage you should own.

7. 3 QUICK WINS (Implement in 7 Days)

WIN 1 - 48 hours: one domain, correct subsidy maths, one WhatsApp number

301 mysun.co (currently HTTP 500) and mysunn.in onto itsmysun.com, then re-point every ad, listing, GBP profile and transparency record. Rewrite the PM Surya Ghar page: delete 'up to 40% of installation costs', publish the fixed slabs - Rs.30,000 / Rs.60,000 / Rs.78,000 for 1 / 2 / 3+ kW, DBT, 5.75% scheme loans, Rs.18,000 per kW for GHS/RWA - and add 'MNRE process; MYSUN does not approve subsidy'. Consolidate to one WhatsApp Business number with per-source ref tracking. Expected: zero dead clicks, no compliance exposure, and attributable cost per conversation.

WIN 2 - 7 days: feed the calculator and put the money offer in the ad

Point every creative at /solar-calculator rather than the homepage, and fire distinct events on calculator-start, report-generated, WhatsApp-click and Flexi-pay-booking so Meta optimises on intent. Speed up or replace the 'couple of minutes' report loader with an instant estimate plus an emailed detailed report. Lead the creative with the offer nobody else in this cohort can match: Zero Cost EMI, loans to 60 months, 25-30% deferred payment, book for Rs.6,999. Expected: 1.5-2x report completions and a real mid-funnel conversion event to scale against.

WIN 3 - 14 days: 2026 proof, ARBOR/CANOPAS as the hook, 60-day retargeting

Refresh everything dated: replace the 2018 case-study cards and the Jul-2021 press wall with current installs, and say out loud that Tata Cleantech Capital and General Catalyst's Hemant Taneja backed you. Shoot 20 Reels across Delhi NCR - terrace before/after, net meter, customer reading the bill - and make ARBOR / CANOPAS solar pergolas the top-of-funnel hook, since 'beautiful homes' is a differentiated angle no competitor in this cohort runs. Audiences: calculator abandoners, report-generated non-buyers, pergola viewers, 50% video viewers - 60-day windows. Expected: Day-1 leak closed and a premium segment the price-war brands cannot follow you into.

EXPECTED IMPACT

Metric	Current (14 Sep 2026)	After Wins	Impact
Domains	mysun.co = HTTP 500, plus 3 in use	One domain, others 301'd	Zero dead clicks
Subsidy accuracy	'up to 40%' + table error	Correct fixed slabs	Compliance cancellations + fewer
WhatsApp routing	Two numbers, untracked	One number, per-source ref	Attributable cost per chat
Calculator traffic	~3 creatives, homepage-led	All ads land on calculator	1.5-2x report completions
Proof freshness	2018 cases, 2021 press	2026 installs + investor names	Day-1 leak closed
Cost per residential lead	Rs.250-450	Rs.150-250	~40% cheaper

READY TO PLUG THESE LEAKS?

Smart Pursuit will run a **14-day solar sprint** for MYSUN: consolidate three domains onto one, correct a published subsidy table that currently contains a factual error and an arithmetic error, feed the calculator that is genuinely the best asset in this Day-1 cohort, and turn 2018-2021 press into 2026 proof. Priced against **CPL and cost per site survey / installed kW**, not impressions.
