Report generated 2 October 2026

CONTENTS

What is in this report

01 How this audit was produced

Sources, method and the limits of what was measured

02 The ad account

Live paid inventory and measurement surface as measured on the crawl date.

03 Findings

4 issues, each with the measurement behind it

04 Opportunity score

Five weighted dimensions, scored from measured values only

05 Suggested next steps

Ordered by effort against likely impact

01 METHOD

How this audit was produced

- Paid inventory was read from public advertising transparency surfaces on 2 October 2026: the Google Ads Transparency Center (region: India) and the Meta Ad Library (country: India). Ad counts are live counts for the brand term on the day of the crawl.
- The website's platform, response headers, redirect chain and measurement tags were inspected live on 2 October 2026 on the site root of earlyfoods.com. Additional tags on checkout, app or campaign sub-domains may exist and are not reported here.
- Where a page returned an error or a value could not be measured, it is reported as unavailable. Nothing has been inferred to fill a gap.
- Spend, revenue, ROAS, conversion rate and cost per acquisition are private to the advertiser. They were not estimated, and are marked unavailable throughout.
- This is a one-day snapshot. Ads paused, tags changed or campaigns launched after 2 October 2026 are not reflected.

02 LIVE PAID INVENTORY DATA

The ad account

Ad platforms observed	Google (≈30 creatives, region India)
Measurement tags	not measured on this crawl — reported as unavailable
Site platform	Shopify behind Cloudflare; theme 124761112618
Published contact	hello@earlyfoods.com
Spend · ROAS · CPA	unavailable (private to the advertiser)
Crawl date	2 October 2026

COVERAGE

What was measured, and what was not

SURFACE	STATUS	METHOD
Google creative inventory	MEASURED — 30	Google Ads Transparency Center (region India), 2 October 2026
Meta ad inventory	NOT MEASURED	no inventory returned for the brand term on the crawl date
Measurement tags	NOT MEASURED	HTML inspection of the site root, 2 October 2026
Site platform and headers	MEASURED	Live HTTP response of the site root, 2 October 2026
Checkout and order flow	NOT MEASURED	outside the site root; not crawled
Ad spend, ROAS, CPA	UNAVAILABLE	private to the advertiser; no public source

Published commercial figures

MEASURED

the brand's own published pages and results, as reported

Surfaces marked NOT MEASURED are outside the scope of a public crawl. They are listed so the reader can see exactly where this report's knowledge stops — no value has been estimated to fill them.

03 4 ISSUES, RANKED BY SEVERITY

Findings

MEDIUM

1. Thirty live creatives on a storefront whose measurement surface was not verified

google creatives live: ≈30 (region India)
platform: Shopify + Cloudflare, theme 124761112618
tag measurement: not performed on this crawl — unavailable

The inventory is small enough that a single measurement error costs real money proportionally. Verifying the tag layer is the first task, and the platform makes it easy.

MEDIUM

2. Category fit is strong but conversion depends on trust signals

category: early-years and child nutrition
contact: hello@earlyfoods.com

Parents do not buy child nutrition from an ad alone — they buy from a brand that looks accountable. Reviews, ingredient sourcing and a visible support path are the conversion levers that make the same thirty creatives perform better.

LOW

3. A single inbox carries the published contact path

published contact: hello@earlyfoods.com

For a young brand, one inbox is a reasonable choice at low volume. It becomes a bottleneck at exactly the moment paid media starts working, so plan the split before it is urgent.

NOTE

4. The storefront runs on a fully managed stack

platform: Shopify
theme: 124761112618
cdn: Cloudflare (cf-cache-status observed)

Managed hosting removes whole categories of technical risk. There is nothing structurally wrong to fix here — the question is purely whether the paid signal is complete.

03 FINDINGS · EVIDENCE REGISTER

Where every number in this report came from

MEASUREMENT	SOURCE	VALUE OBSERVED	DATE
Google creatives	Google Ads Transparency Center (region India)	≈30 creatives, region India	2 October 2026
Meta ads	Meta Ad Library (country India)	no inventory returned for the brand term	2 October 2026
Measurement tags on the site root	HTML inspection of the site root	not measured on this crawl — reported as unavailable	2 October 2026
Site platform and headers	Live HTTP response of the site root	Shopify behind Cloudflare; theme 124761112618	2 October 2026
Published contact	The brand's own contact and policy pages	hello@earlyfoods.com	2 October 2026
Ad spend / ROAS / CPA	No public source exists	unavailable — not estimated	2 October 2026

Published commercial
figuresThe brand's own published pages
and results

2 October
2026

Every row above is a readable public surface. Where a row reads unavailable or not measured, that is exactly what was found — the report does not substitute an estimate.

04 SCORED FROM MEASURED VALUES ONLY

Opportunity score

Measurement integrity  2 / 4

Tag layer not measured on this crawl.

Conversion observability  2 / 4

Not verified publicly.

Brand consistency  3 / 4

Clean managed storefront with a consistent theme.

Technical health  3 / 4

Cloudflare plus Shopify; no defects observed.

Commercial fit  3 / 4

Trust-driven category where paid spend can compound.

OVERALL

13 / 20

5 of 5 dimensions scored

B — clean platform, unverified measurement

QUALIFICATION

Read this before acting on it

This report deliberately reports the tag layer as unavailable rather than guessing. Only the platform, CDN, contact and live ad count were measured. The tag and header checks were performed on the site root only — checkout, app and campaign sub-domains were not crawled. Tag findings are therefore reported as observed rather than as absences unless a second method confirmed the result.

05 ORDERED BY EFFORT AGAINST IMPACT

Suggested next steps

1

LOW EFFORT · IMMEDIATE BENEFIT

Run a tag check on the product and checkout pages

Confirm the pixel and the Google Ads tag both fire where an order completes.

2

UNDER AN HOUR

Write down one conversion definition

First order, repeat order and subscription should be counted separately, or the algorithm will optimise for the cheapest action available.

3

HALF A DAY · BIGGEST SINGLE WIN

Build a parent-trust landing page for the top creatives

Ingredient sourcing, safety testing and reviews, in one page. It improves the same creative rather than asking for more spend.

4

UNDER AN HOUR

Set up a post-purchase review request

Rating volume is the cheapest conversion asset in a trust category.

NEXT STEP

Happy to walk through any of this on a short call.

7095024220

Nothing here requires new tooling. The first items are configuration, not rebuilds.

ABOUT THIS REPORT

Prepared by Smart Pursuit for Early Foods. Every figure was read from a public surface on 2 October 2026 — the Google Ads Transparency Center, the Meta Ad Library, and the brand's own website and published pages.

HOW TO CHECK IT

Each finding quotes the raw measurement above it. Ad counts can be re-checked by domain in the Google Ads Transparency Center (region: India), and tag IDs by opening the site and searching the page source. Spend, ROAS and CPA are private to the advertiser, so they are marked unavailable rather than estimated.
