Report generated 2 October 2026

CONTENTS

What is in this report

01	How this audit was produced Sources, method and the limits of what was measured
02	The ad account Live paid inventory and measurement surface as measured on the crawl date.
03	Findings 5 issues, each with the measurement behind it
04	Opportunity score Five weighted dimensions, scored from measured values only
05	Suggested next steps Ordered by effort against likely impact

01 METHOD

How this audit was produced

- Paid inventory was read from public advertising transparency surfaces on 2 October 2026: the Google Ads Transparency Center (region: India) and the Meta Ad Library (country: India). Ad counts are live counts for the brand term on the day of the crawl.
- The website's platform, response headers, redirect chain and measurement tags were inspected live on 2 October 2026 on the site root of anandsweets.in. Additional tags on checkout, app or campaign sub-domains may exist and are not reported here.
- Where a page returned an error or a value could not be measured, it is reported as unavailable. Nothing has been inferred to fill a gap.
- Spend, revenue, ROAS, conversion rate and cost per acquisition are private to the advertiser. They were not estimated, and are marked unavailable throughout.
- This is a one-day snapshot. Ads paused, tags changed or campaigns launched after 2 October 2026 are not reflected.

02 LIVE PAID INVENTORY DATA

The ad account

Ad platforms observed	Google (≈58 creatives, region India) · OpenAI ad pixel detected on site
Measurement tags	OpenAI ads pixel MsnBMqKgkHHz42jqdSfTfFQ observed in the storefront source
Site platform	Shopify behind Cloudflare; theme 162670313687
Security headers	HSTS max-age=7889238 · CSP present · X-Frame-Options DENY · X-Content-Type-Options nosniff
Structured data	aggregateRating 4.4 from 250 ratings
Spend · ROAS · CPA	unavailable (private to the advertiser)
Crawl date	2 October 2026

COVERAGE

What was measured, and what was not

SURFACE	STATUS	METHOD
Google creative inventory	MEASURED — 58	Google Ads Transparency Center (region India), 2 October 2026
Meta ad inventory	NOT MEASURED	no inventory returned for the brand term on the crawl date
Measurement tags	MEASURED — OpenAI ads pixel MsnBMqKgkHHz42jqdSfTfFQ observed in the ...	HTML inspection of the site root, 2 October 2026

Site platform and headers	MEASURED	Live HTTP response of the site root, 2 October 2026
Checkout and order flow	NOT MEASURED	outside the site root; not crawled
Ad spend, ROAS, CPA	UNAVAILABLE	private to the advertiser; no public source
Published commercial figures	MEASURED	the brand's own published pages and results, as reported

Surfaces marked NOT MEASURED are outside the scope of a public crawl. They are listed so the reader can see exactly where this report's knowledge stops — no value has been estimated to fill them.

03 5 ISSUES, RANKED BY SEVERITY

Findings

MEDIUM

1. An OpenAI advertising pixel is live on the storefront

```
pixel observed: MsnBMqKgkH42jqdSfTfFQ (OpenAI ads)
context: 58 live Google creatives alongside
platform: Shopify + Cloudflare, theme 162670313687
```

Testing a new ad surface this early is a genuine advantage — most brands in this category have not started. The question to answer next is whether that pixel is tied to the same conversion definition as the Google account.

LOW

2. The public rating signal is thin for the level of spend

```
aggregateRating: 4.4
rating count: 250
live creatives: ≈58
```

Two hundred and fifty ratings is a small social-proof base for a heritage brand running this much creative. Review volume is usually the cheapest available conversion lever.

LOW

3. A single shared inbox carries all published contact

```
published contact: care@anandsweets.net
separate retail, gifting or corporate contacts: none published on the pages reviewed
```

Order queries, corporate gifting enquiries and complaints arriving in one inbox is a routing problem, not a headcount problem. A gifting enquiry is worth many times a cake query.

NOTE

4. Technical and security posture is the best in this group

```
strict-transport-security: max-age=7889238
content-security-policy: block-all-mixed-content; frame-ancestors 'none'
x-frame-options: DENY
x-content-type-options: nosniff
cdn: cloudflare (cf-cache-status DYNAMIC)
```

Headers like these are set by people who care. Measurement discipline, not infrastructure, is where the remaining upside sits.

NOTE

5. Heritage positioning is a real commercial asset

```
founded: 1988
headquarters: Dickenson Road, Bengaluru 560042
published: heritage sweet house, now D2C + retail
```

Thirty-eight years of brand equity is not something paid media can buy. The audit's job is to make sure paid traffic converts against that equity rather than diluting it.

03 FINDINGS · EVIDENCE REGISTER

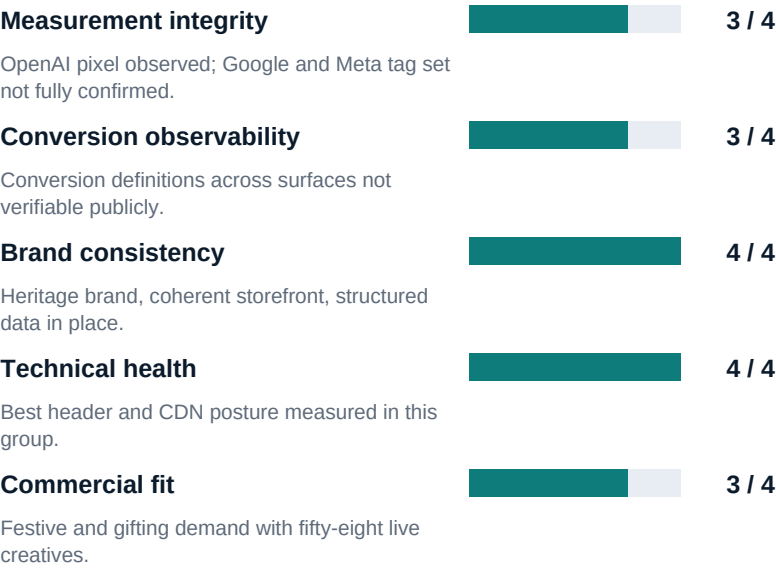

Where every number in this report came from

MEASUREMENT	SOURCE	VALUE OBSERVED	DATE
Google creatives	Google Ads Transparency Center (region India)	≈58 creatives, region India	2 October 2026
Meta ads	Meta Ad Library (country India)	no inventory returned for the brand term	2 October 2026
Measurement tags on the site root	HTML inspection of the site root	OpenAI ads pixel MsnBMqKgkHHz42jqdSfTfFQ observed in the storefront source	2 October 2026
Site platform and headers	Live HTTP response of the site root	Shopify behind Cloudflare; theme 162670313687	2 October 2026
Published contact	The brand's own contact and policy pages	none published on the pages reviewed	2 October 2026
Ad spend / ROAS / CPA	No public source exists	unavailable — not estimated	2 October 2026
Published commercial figures	The brand's own published pages and results	published: heritage sweet house, now D2C + retail	2 October 2026

Every row above is a readable public surface. Where a row reads unavailable or not measured, that is exactly what was found — the report does not substitute an estimate.

04 SCORED FROM MEASURED VALUES ONLY

Opportunity score

OVERALL

17 / 20

5 of 5 dimensions scored

A — clean foundations; the upside is measurement and social proof, not repair

QUALIFICATION

Read this before acting on it

Anand Sweets has the strongest technical posture in this set, so most findings here are opportunities rather than faults. Google inventory is a live count for one day. Financial and rating figures come from the brand's own published surfaces. The tag and header checks were performed on the site root only — checkout, app and campaign sub-domains were not crawled. Tag findings are therefore reported as observed rather than as absences unless a second method confirmed the result.

05 ORDERED BY EFFORT AGAINST IMPACT

Suggested next steps

1

LOW EFFORT · IMMEDIATE BENEFIT

Confirm the OpenAI pixel fires on the conversion page

It is live in the source. Verifying it fires where an order completes turns an experiment into a measured channel.

2

UNDER AN HOUR

Write one conversion definition for all channels

Google and OpenAI should count the same event, or channel comparisons will not hold.

3

HALF A DAY · BIGGEST SINGLE WIN

Route contact by intent before the festive season

Separate corporate gifting from retail queries. Festive enquiries have the highest ticket size in the calendar and currently share one inbox.

4

UNDER AN HOUR

Ask for reviews at delivery

Two hundred and fifty ratings is thin against fifty-eight live creatives. An automated post-delivery request is a one-time setup.

5

LOW EFFORT

Check the festive creative-to-landing match

Heritage gifting ads should land on a gifting page, not the storefront home.

NEXT STEP

Happy to walk through any of this on a short call.

7095024220

Nothing here requires new tooling. The first items are configuration, not rebuilds.

ABOUT THIS REPORT

Prepared by Smart Pursuit for Anand Sweets. Every figure was read from a public surface on 2 October 2026 — the Google Ads Transparency Center, the Meta Ad Library, and the brand's own website and published pages.

HOW TO CHECK IT

Each finding quotes the raw measurement above it. Ad counts can be re-checked by domain in the Google Ads Transparency Center (region: India), and tag IDs by opening the site and searching the page source. Spend, ROAS and CPA are private to the advertiser, so they are marked unavailable rather than estimated.
